

Microsoft Teams *A True Collaboration Success Story*

The Competitive Advantage

Microsoft Teams comes with the most basic subscription of Office 365, there are many qualities that makes Teams a unique product. It starts with it's unique "one stop shop" development. Microsoft Teams is the only solution that truly integrates Unified Communications and Collaborations, while most competitors need to rely on 3rd party applications for Document Sharing, Creation and Collaboration.

Uncomprised Mobile Experience

Collaborate via mobile using screen share, live camera feed share, PowerPoint navigation, and give/take control.

Diverse & Inclusive Communication

- Schedule meetings in Teams or use Outlook integration.
- Worldwide coverage, including audio conferencing for 90+ countries.
- Spontaneously meet up 1:1 or start group video calls anytime.
- Meet across organizational borders where Internal and External guests can join.
- Communicate with Live Event to 10,000 attendees

Continuous Collaboration Lifecycle

Collaborate via integrated chat and channels, organize files in one place for easy reference and keep everyone on the same page.

Pre-Meeting

- Review meeting agenda
- Learn more about other attendees,
- Co-author deliverables
- Collaborate in the same persistent chat for the entire meeting lifecycle.

During the Meeting

- Collaborate via persistent chat.
- Share desktop, applications, whiteboard, and PowerPoint.
- Rich Audio and Video experiences that work seamlessly from the mobile phone/desktop to the boardroom

Post Meeting

- Review meeting notes for action items, next steps.
- Review recording
- Transcript
- Facial Recognition
