

# Istation

## Six Easy Ways to Increase Usage

### 1. Station Rotations

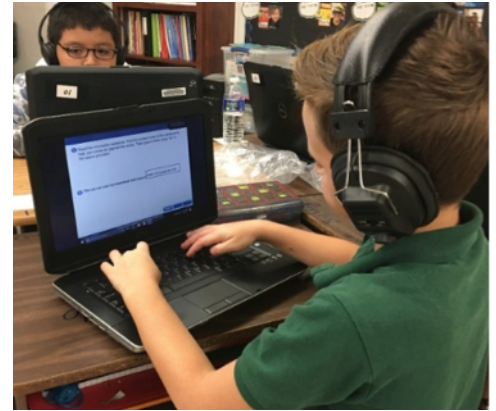

Utilize Istation during your reading or math station rotations. Rotations lasting 15-20 minutes are perfect for helping students reach their recommended usage for the week.

### 2. Beginning or End of the School Day

The transitions at the beginning of the day when students are arriving and when they start packing up at the end of the day are great times to log in to Istation for extra minutes.

### 3. Home Usage

Students can use Istation on their home device and work on their instructional learning path outside of school. To view an example home usage calendar with instructions for parents, click here or visit the Istation.com website and navigate to Help Center → Get Started → At Home.

	Istation Reading
Tier 3	90 min/week
Tier 2	60 min/week
Tier 1	30 min/week

### 4. Run a Contest

Bring out the competitive nature in your staff by running a classroom usage contest. The class with the highest average usage during the defined period of time can earn a prize!

### 5. Tutorials

Before- and after-school tutoring sessions are a great time for students to work on their individualized learning paths.

### 6. Student Goals Report

The Student Goals Report will not only inspire students to increase usage, but will also promote ownership of their learning and growth. Istation provides a Goals Report under each student's information page. The program will automatically set goals for students based on their first assessment score; however, teachers can also manually set these goals based on what they feel is appropriate for the individual student. Print these out and have students track their progress toward their goal.
