PARSABLE SAFETY ACCELERATOR DATASHEET

PARSABLE
JOBS DONE RIGHT, EVERY TIME.

Once thought of as the safety manager's concern, there is now a growing recognition that plant safety impacts everything from employee happiness to overall plant productivity. Globally, process industries lose around $20 billion, or about 5% of total production, due to process disruptions — 80% of which are preventable.

With the launch of ISO 45001, the first global standard for occupational health and safety, it's more important than ever to create a proactive culture of safety as a foundation for operational excellence. The growing consensus is this not only lowers business risk, but also boosts overall performance.

According to Aberdeen Group, best-in-class companies that place a larger emphasis on workplace safety experience significantly fewer injuries and repeat accidents than average, as well as improvements in productivity, uptime and output.

BEST-IN-CLASS

18x
Lower rate of injuries

3x
Less asset downtime*

Safety Accelerator for CPG

enables you to proactively improve workplace safety. With unprecedented visibility and control over human-led plant floor activities, you can reduce the rate of preventable accidents, enable better issue reporting and continuously iterate safety SOPs to eliminate repeat incidents.

PARSABLE CONNECTED WORKER ACCELERATOR

CONSISTENT	TRANSPARENT	DYNAMIC	
Smart digital procedures	**End-to-end visibility**	**Continuous improvement**	*Capabilities Delivered*
Improve adherence by turning safety SOPs into "just-in-time" microlearning	Improve incident traceability by enabling real-time issue reporting on the plant floor	Accelerate safety improvements by instantly publishing SOPs updates	
Poor safety adherence	**Lack of traceability**	**Rigid processes**	*Challenges Addressed*
No way to enforce consistent adherence to safety procedures	Lack of data to continuously identify preventive actions	Inability to take timely action on safety incidents	

Business Benefits

By digitizing safety procedures, safety managers can now take proactive measures to improve the safety and wellbeing of their employees, decreasing business risk and boosting overall plant productivity.

Improve productivity
Support improved employee wellbeing, safety and productivity

Fewer incidents
Reduce injury rates by improving adherence to safety procedures

Decreased risk
Identify and mitigate unsafe habits for fewer repeat accidents

What's Included

Parsable Safety Accelerator extends the value of Parsable's industry-leading Connected Worker Platform with best-practice templates and pre-configured dashboards.

Consistent. Smart digital procedures for consistent safety adherence

Features

**Rich-Media Content** — Inline videos, photos, GIFs and PDFs
Team Roles — Roles, permissions and automatic alerts
Digital Verification — Photo or video documentation & digital signoff

Templates

Best-practice SOPs for core safety procedures:
5s Audit; Workplace Safety Audit; HSE Inspection; Unsafe Conditions Report; Near Miss Report; Safety Inspection; and Safety Incident

Transparent. Tools to track incidents and take action

Features

Time-Stamps — Complete execution history for every step
**3rd Party BI** — Ability to connect 3rd party visualization tools
Data Export — Out-of-the-box data transformations for Excel

Dashboards

Pre-configured dashboards to easily visualize workplace safety:
Safety Cross; Safety Issues by Region; Safety Overview by Facility: Safety Triangle and Issues by Line and Machine

Dynamic. Tools to continuously improve workplace safety

Features

Template Authoring — Intuitive web-based template authoring
Job Planning — Mobilize your team to address incidents in real time
Issues — Mobile issue reporting for timely and complete incident reporting
