

Blueprint for the Factory of the Future: Humans Still at the Center

3 Supplied parts provide traceability through blockchain and signal presence through RFID.

4 Recycled materials feed sustainable additive to 3D printing.

5 Humans monitor, optimize, and change over machines, as well as, maintain all equipment.

2 Suppliers receive demand signal electronically.

6 Assembled product has combined traceability through blockchain & unique RFID signal.

7 Autonomous forklifts load autonomous delivery vehicles to deliver directly to customer.

1 Modern vocational schools supply talent with hands-on experience.
