

## Monthly update – October 2018

Michael Rong +61 3 9640 3863 | michael.rong@wilsonsadvisory.com.au; William Liu +61 2 8247 3187 | william.liu@wilsonsadvisory.com.au

### Domestic market

The S&P/ASX 200 Index returned -6.1% through October as local markets reacted to selling on Wall Street and growth shares came under pressure. Sectors that have enjoyed a relatively robust earnings trajectory in recent months, such as Health Care (-7.0%) and Information Technology (-11.2%), were hit hard as investors backed away from elevated valuations. Returns for 'bond proxy' sectors such as Utilities (-4.0%) and A-REITs (-3.1%) were the least negative during the month but continue to be buffeted by moves in the US bond market, which has seen yields push higher as investors raise their inflation expectations in response to the strength and duration of the current US economic cycle.

Some of Australia's own growth darlings came under pressure, including fintech player Afterpay Touch (-30.4%) and global logistics software provider WiseTech (-27.3%), but both were still trading at around 50x FY20 earnings by month-end. Within the Energy sector (-10.5%), Worley Parsons (-24.7%) saw the biggest drop, with investors cautious about the price paid for its \$4.6 billion acquisition of Texas-based Jacobs Engineering's energy, chemicals and resources business.

### Global markets

In the US, the market rally gave way to a rolling bear market in October, with debate raging about whether the selloff was predominately technical or driven by fundamentals. Global shares, measured by the MSCI World Ex Australia Index, returned -5.2% in Australian dollar terms, while small cap shares fared even worse, returning -8.0%. While systematic flows may have exacerbated the drawdown, there are signs of slowing earnings momentum in the US and companies missing EBIT margin estimates for 2019, while liquidity and Fed tightening remain overarching concerns.

The S&P 500 Index returned -6.8% in US dollar terms, and in price terms the index surrendered all of its year-to-date gains in just three weeks. Losses were concentrated in the areas of the market where fund managers have relatively higher levels of exposure, including IT (-8.1%), Consumer Discretionary (-11.3%), Energy (-11.3%) and Industrials (-10.9%). The Stoxx Europe 600 Index lost 5.3% in October with the largest falls coming from Industrial Goods and Services (-9.3%), Technology (-8.7%), and Banks (-9.3%). Chinese equities and the yuan remained under pressure over the past month as investors fretted over the ongoing slowdown in growth and the potential negative impact from the escalating trade war with the US.

### Wilsons Investment Strategy

Issued by Wilsons Advisory and Stockbroking Limited ("Wilsons") ABN 68 010 529 665 - AFSL No. 238375, a participant of ASX Group. Past performance is not a reliable indicator of future performance. This document should be read in conjunction with the disclosures and disclaimer at the end of this document.

## Currencies

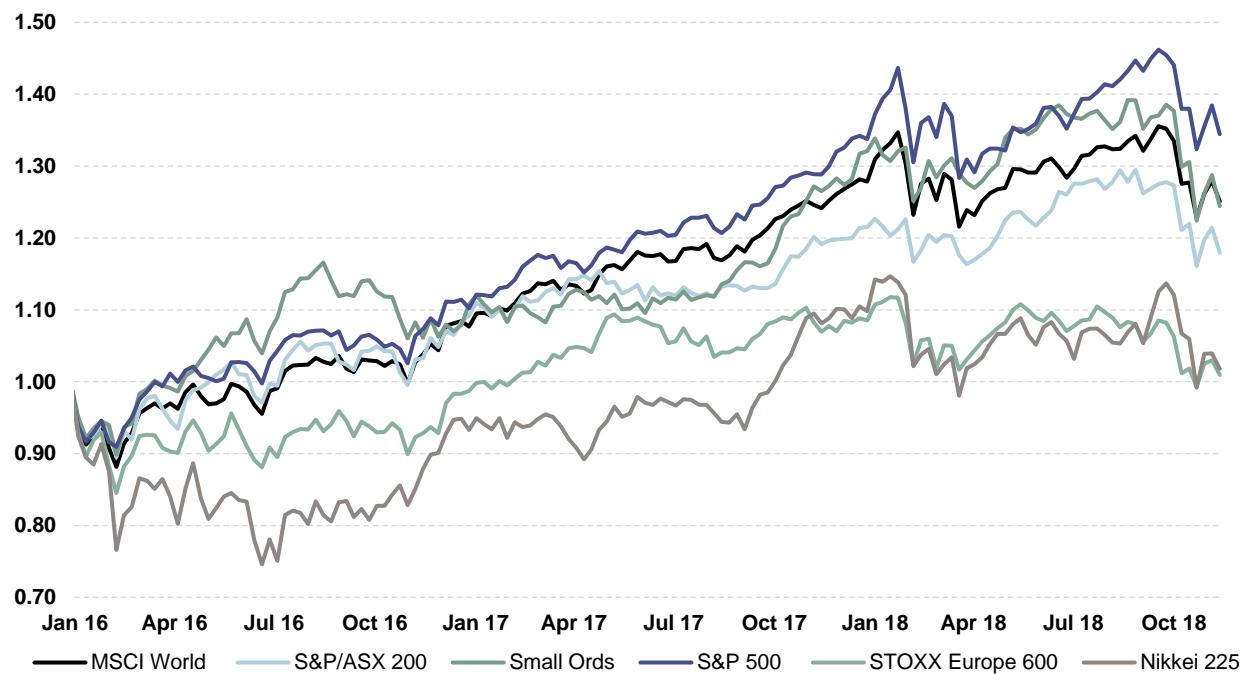

The Australian dollar fell 2.1% in October to US \$0.7072 and is down 7.7% over the past 12 months. The currency is close to levels reached during the 2015-16 Chinese deflation scare, although somewhat at odds with the more sombre forecasts, bulk commodity prices have remained relatively steady this year. Emerging market currencies staged a recovery in October, with the Brazilian real up 9.4% against the US dollar and the Turkish lira rising 8.8%.

The Australian dollar was down 0.5% in trade-weighted terms through October, falling against the USD (-2.1% to 0.71), EUR (-0.5% to 0.63), JPY (-2.7% to 79.95) and flat against the GBP (0.55). Over the three months to the end of October, the Australian dollar has depreciated 4.9% against the US dollar, falling from a high of 0.7459 in August to a low of 07053 in October. On a trade-weighted basis, the Australian dollar has depreciated 2.5% over the past three months, losing value against the EUR (-1.5%), GBP (-2.1%), JPY (-3.8%) and NZD (-0.6%).

## Commodities

Commodities were mixed through October, with copper (+0.3%), tin (+0.6%) and zinc (+1.8%) holding firm while nickel (-10.2%), lead (-7.4%) and aluminium (-5.2%) suffering falls. Gold rose 1.1% to end the month at US \$1213.34/oz, down from its April high of \$1358.31. Oil prices slid in October, with Brent crude falling 9.5% from US \$82.72 per barrel to \$74.84 and WTI falling from \$73.16 to \$65.31.

## LIC key preferences

---

We provide an overview of our preferred LICs within each category:

1. Domestic equities – large/medium cap and medium/small cap
2. Absolute return funds
3. International equities
4. Specialist funds

When selecting these funds we examined their performance against the following key metrics:

- **NTA and total return (share price and dividends paid) performance** – has the LIC delivered on its investment objective of outperforming its underlying benchmark?
- **Dividends paid and stability of dividends paid** – has the LIC paid a dividend to shareholders and has there been a stable and continuous dividend paid profile?
- **Premium/discount to NTA** – what is the current premium/discount to NTA? How has the share price traded relative to its NTA through time?
- **Liquidity** – is there sufficient liquidity to enter and exit the fund?
- **Underlying management team** – is the manager well regarded in the market? Is there transparency in the underlying portfolio and the team's investment process?

Gross dividend yield 6.9%

Source: Wilsons, company data, IRESS  
\*NTA performance is exclusive of dividends paid. Total return is share price and dividends paid.

### Fund description

AMCIL manages a concentrated investment portfolio comprising 40 to 50 stocks covering large and small companies in the Australian equity market.

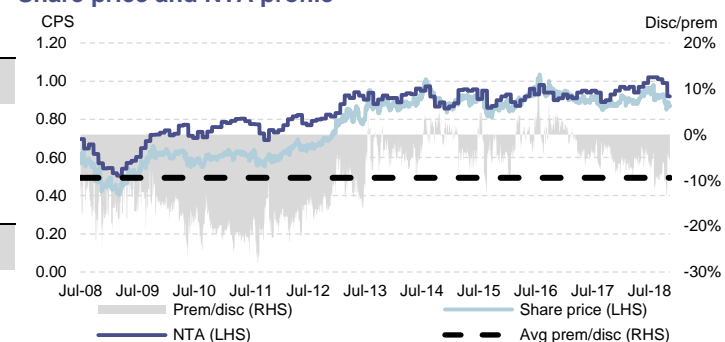

As a result, small companies by market size can have an equally important impact on portfolio returns as larger companies in the Australian market. The number of holdings in the portfolio will depend on market conditions and investment opportunities. The selection of stocks in the portfolio is based on attractive valuations as well as the outlook for growth and the competitive structure of the industry.

Given the concentrated investment focus of AMCIL, holdings will be sold from time to time to fund additional investments to the portfolio.

\*NTA performance is exclusive of dividends paid. Total return is share price and dividends paid.

### Fund description

The investment objective is to provide long-term capital growth over a five year-plus investment horizon through investment in a diversified portfolio of quality, undervalued ASX-listed equities and other investment securities, outside the ASX top 20 securities.

The ASX top 20's composition is very concentrated by sector, with the financials and materials sectors combined representing almost 70% of holdings. An investment portfolio that is based on stocks outside the top 20 has a much broader and evenly spread set of sectors.

It is QV's belief that companies ex the top 20 can still be leaders in their field with competitive advantages over their peers and strong recurring and predictable earnings offering greater opportunities for above-market returns.

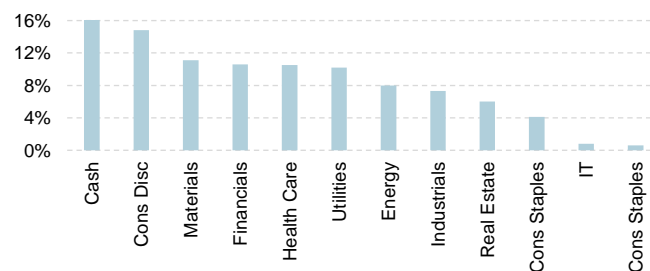

As well as long-term capital growth, Investors Mutual (QV is one of IML's funds) is focused on long-term income growth, seeking investment opportunities that pay sustainable and growing dividends with active franking credits. The portfolio is managed from an Australian investor's perspective, with tax being an important consideration in its daily management.

Wilsons Corporate Finance Limited (ACN 057 547 323: AFSL 238 383) acted as Lead Arranger and Joint Lead Manager in the December 2017 IPO of Spheria Emerging Companies Limited securities for which it received fees or will receive fees for acting in this capacity. This document should be read in conjunction with the disclosures and disclaimer at the end of this document.

### Fund description

Spheria is an Australian small cap and microcap fund manager with a combined 40 years' of investment experience and an excellent track record, generating top-quartile returns to have relatively low risk.

The manager will seek to purchase securities in businesses where the present value of future free cash flows can be reasonably ascertained, and the security is trading at a discount to the assessed fundamental valuation. Preference will be given to companies it considers to have relatively low risks – entities that are geared to a level that the manager considers appropriate given the nature of the relevant businesses – and have free cash flow to support that relevant level of gearing.

\*NTA performance is exclusive of dividends paid. Total return is share price and dividends paid.

### Fund description

One of Australia's few specialist listed funds to invest in Australian microcap shares, Acorn Capital focuses on this generally neglected part of the market because of the lack of research in this area provides scope to uncover growth opportunities.

Acorn aims to exploit inefficiencies in the pricing of stocks that arise from information gaps about microcaps, and to identify opportunities for long-term growth. The fund is style and sector neutral, typically holding a portfolio of 65-80 stocks with a low expected portfolio turnover.

At the end of 2017 Acorn announced the \$7.5m acquisition of seven assets from Washington H Soul Pattinson. The acquisition will be funded by share issuance at its post-tax NTA. With part of the consideration deferred, this should be seen as an endorsement of Acorn's management team. The pro-forma market cap post the transaction will lift from \$50m to \$57m. Acorn has recently announced its intention to pay a higher annual dividend target 5% (up from 3%) of closing post-tax NTA (franked to the highest possible extent). With greater size and higher dividend payments it is possible that Acorn's discount to NTA could reduce.

Gross dividend yield	3.5%

Source: Wilsons, company data, IRESS  
 \*NTA performance is exclusive of dividends paid. Total return is share price and dividends paid.

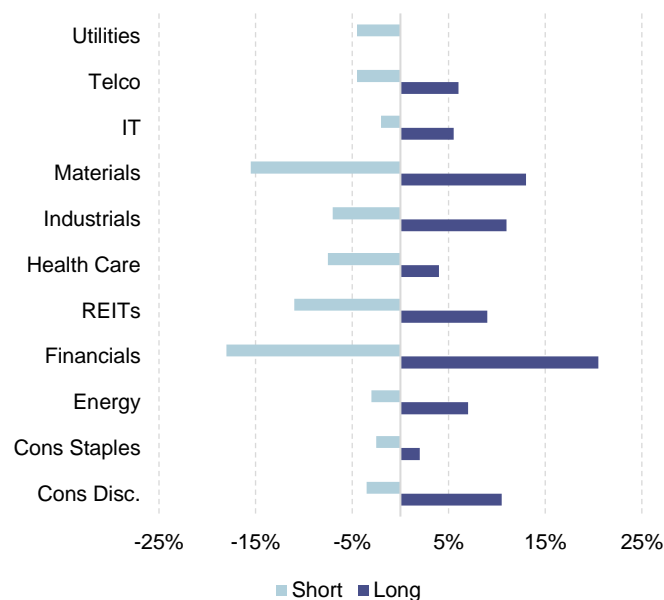

### Fund description

In a market-neutral structure, returns are derived from the difference in performance between a long and a short portfolio of shares. As both portfolios are of equal size, the fund is fully hedged, retaining little or no net exposure to the share market. Irrespective of whether the portfolios are rising or falling, a positive return is achieved when the long portfolio outperforms the short. In this way, returns from a market neutral strategy will have no correlation with the performance of the broader share market, reflecting instead the investment manager's success in selecting the right securities.

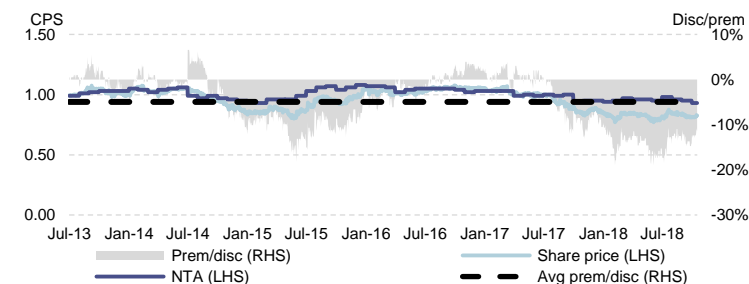

While the share market is generally efficient in valuing companies, there will always be a select group of companies that are mispriced at any given point in time. Watermark's investment strategy allows investors to benefit from its success in identifying "strong" companies to invest in and "weaker" companies to sell short, without being fully exposed to the volatility and risks of the share market.

At the end of FY18 Watermark Funds Management made changes to WMK in light of the difficult market conditions for a market-neutral investment strategy. The international exposure for WMK has been halved to 20% of the total portfolio. Additionally Watermark has flagged potential options to consider addressing discount (over above the buy-back) the LIC trades at with more details expected at Nov AGM.

### Fund description

Access to a concentrated portfolio that will predominantly comprise long and short positions in global listed securities. The portfolio will be actively managed with a focus on capital preservation and aims to generate superior risk-adjusted returns over the long term (>5 years).

The listed vehicle provides access to an investment strategy and an investment manager that had only previously been accessible to wholesale investors with a \$1m minimum investment.

We view the investment manager favourably and believe that the team has deep expertise across equity markets; since inception in 2008 it has successfully implemented the same investment strategy with a strong and robust investment process.

### Fund description

Long-short global securities investment portfolio with a currency overlay. The portfolio will aspire to accumulate wealth over the long term by generating positive returns in excess of the benchmark at below-market levels of risk.

The manager seeks to purchase securities in what it considers to be great businesses that are not valued as such and build a high conviction portfolio with a capital preservation focus. Investors should be aware that returns can vary considerably from broad index returns.

Antipodes was formed in March 2015 by Jacob Mitchell with the backing of Pinnacle Investment Management. The portfolio manager, Mr Mitchell, has more than 20 years' investment experience and prior to forming Antipodes was Deputy Chief Investment Officer and Portfolio Manager at Platinum Asset Management.

### Fund description

MCP is an Australian debt-specialist fund manager. The investment team have on average 30 years' direct lending experience and has shown a strong track record in originating, structuring, negotiating, managing and distributing Australian corporate loans. The MCP Master Income Trust provides a unique opportunity to access monthly cash income from direct lending to Australian corporates.

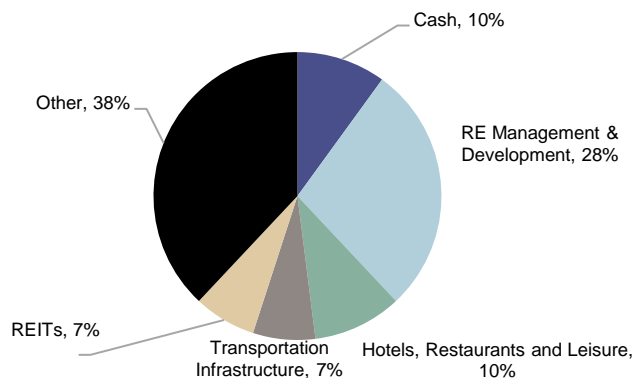

Some of the characteristics of this investment opportunity are its attractive risk-adjusted returns from a diversified portfolio, monthly cash income with low risk of capital loss and low capital volatility, and access to floating rate credit.
