For the attention of Daniel Pitcher

07 February 2019

Dear Daniel

The expert advice we have received from the Water Hygiene Centre as our Authorising Engineer (Water) has been invaluable over the past 7 years. Your comprehensive audits of our management systems and updates to our water safety plan have been exceptional. Advice is always available when needed, which is considered an essential backup for my role as Corporate Responsible Person for Legionella risk management. Your performance is consistently good, and I value the expertise we always have available as required in this specialist field.

I would happily recommend you to others looking for independent professional advice relating to water hygiene.

Yours sincerely

Eddie Milne
Property Resources Manager
