Section 24

Tina5s User Guide - Creating New AutoCAD Drawings From DWT Templates

About Tina

TINA

Build Version : 1.0.0.44994

Build Date : 8/14/2018 12:04:27 PM

Database Version : 2013_02_01_44994

Getting Organized…
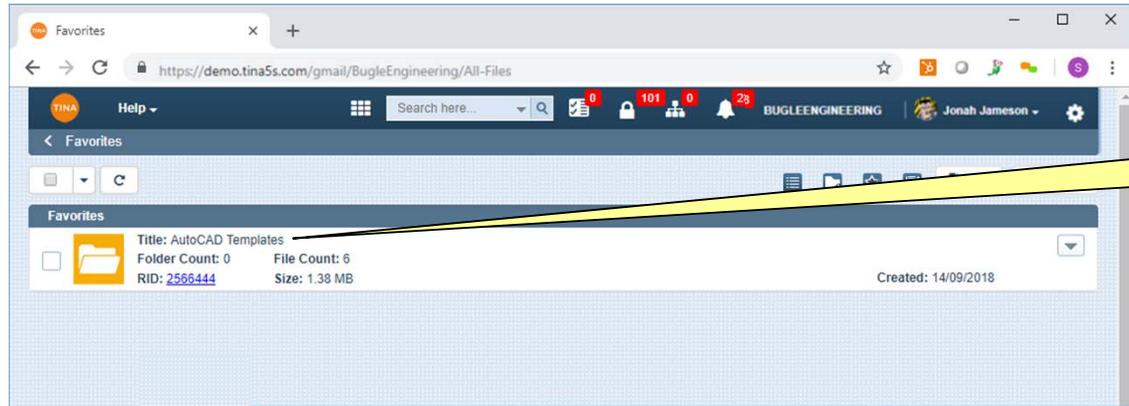

Recommendation #1:

Create a folder in your Favorites and Link/Sync all the DWT templates that you commonly use.
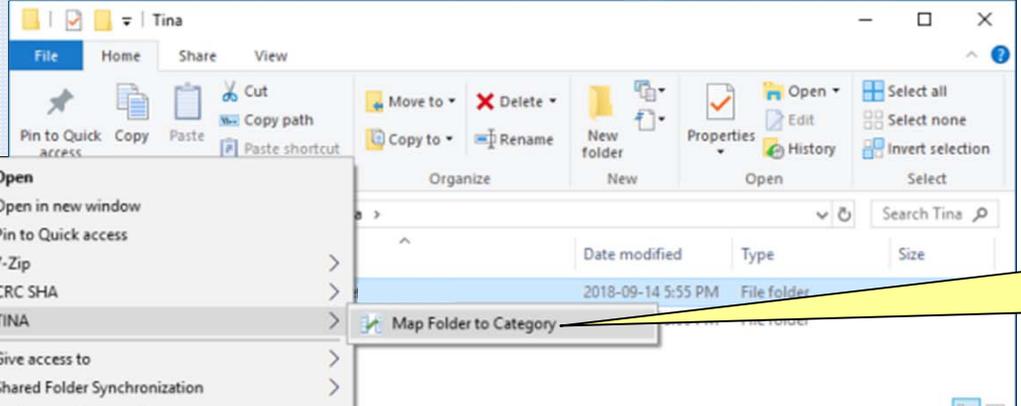

Recommendation #2:

Map your Favorites root folder to the category you most commonly use. When you do this, any new drawings or files that you drag/drop or save to TinaSync will automatically categorize when they upload to Tina.
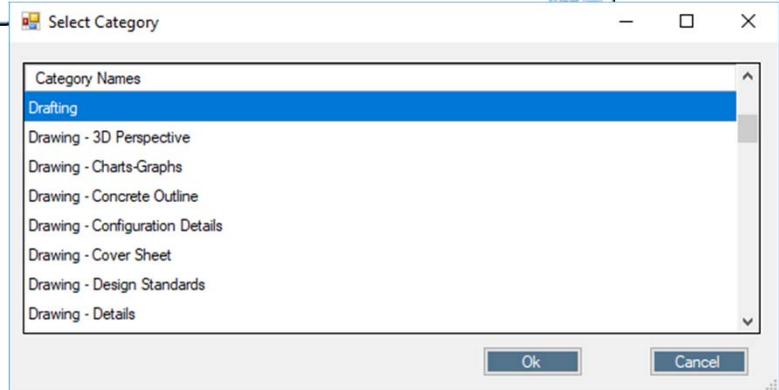

Getting to Work…

1 Open the template you need from here (or from your TinaSync folder)
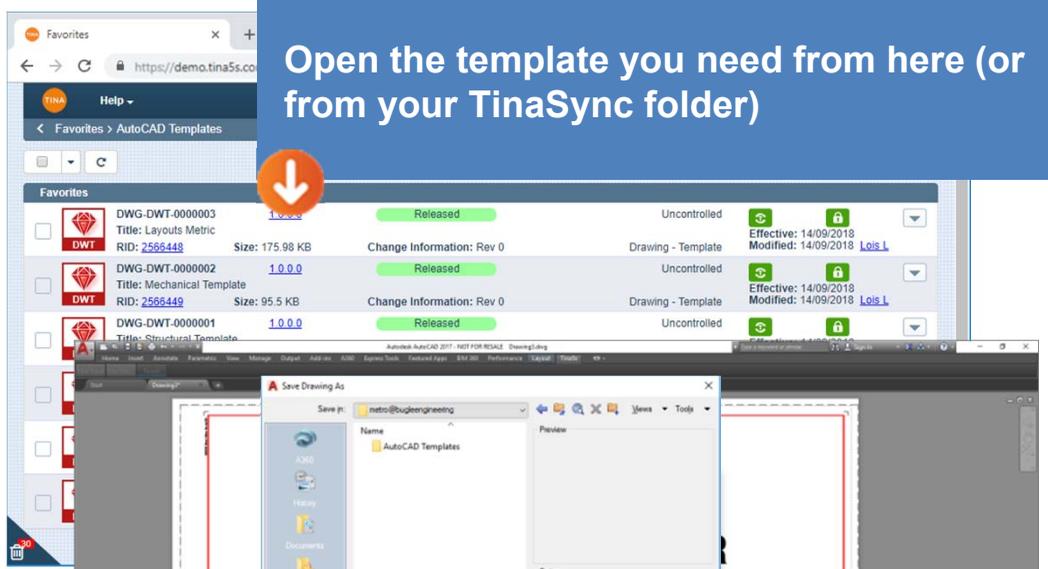

2 Name your new drawing, save it to any TinaSync folder and close it
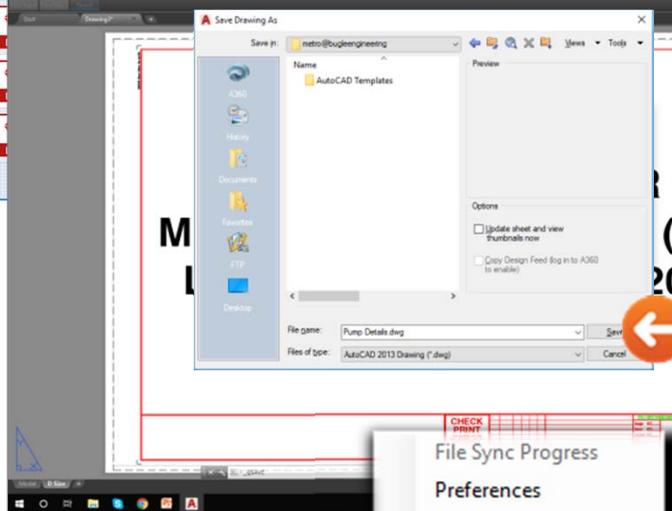

Note the filename: your new file has not yet made it into Tina

Name	Modified	Type	Size
AutoCAD Templates	2018-09-14 5:51 PM	File folder	
Pump Details.dwg	2018-09-14 5:51 PM	DWG File	95

3 Right click on your sync icon in your tray and click on refresh
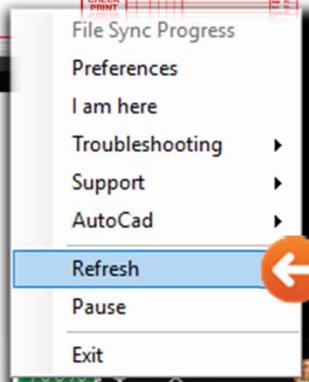

Note the filename: your new file is now categorized and in Tina

Name	Modified	Type	Size
AutoCAD Templates	2018-09-14 5:51 PM	File folder	
DFT-0000144_2566452_Pump Details.dwg	2018-09-14 5:55 PM	DWG File	96
