About InstaViser

InstaViser creates private-label platforms for universities, professional organizations, nonprofits and companies to facilitate mentorship, professional development, and lifelong learning via live, one-to-one conversations.

InstaViser HQ is based in San Francisco, CA. We are a team of former athletes, Olympians, innovators, and technology professionals working to build a great company. Joining the InstaViser Team will challenge you to think creatively, take initiative, and own your success. We value hard work, ingenuity, and the desire to get things done. We recognize and reward achievement. Great teammates will grow and thrive with us.

Role: Part-Time InstaViser Software Developer

We are seeking a part-time Ruby on Rails developer to work with us on product development and site maintenance. This team member will work closely with the CEO and lead engineer on product maintenance and developing new features and tools for our customer platforms. We request a weekly commitment of up to 10 hours and can support remote work. We are a small team and you will be challenged very quickly to lead, both technically and culturally. We recognize and reward achievement. Great teammates will grow with us.

Preferred Qualities:
- At least one year of working on commercial, production quality Ruby on Rails applications and git or other SCM experience
- Bonus points for experience in JavaScript, Zurb Foundation, and rspec/TDD.
- 10-15 hours availability per week.
- Self-starter with strong time management and project organizational skills.

Compensation is negotiable, based on skill set and experience.

If interested, please contact us at jobs@instaviser.com. Include your resume, a cover letter, any additional documents or links that provide background on your work experience, and anything else you feel will help us get to know you better. We look forward to meeting you!
