

AEM Corporation helps federal agencies and corporations do more with less by addressing their most complex program, systems, data, and engineering needs.

OUR PEOPLE

57% are engineers, PhDs, IT professionals or scientists

28% have National Security Clearance

23% have Public Trust Security Clearance

96% retention rate

In addition to its offices in Virginia and California, AEM has employees located in more than 20 other states and Washington, DC.

● States with AEM employees

SERVICE LINES

	Data Management and Analysis	Engineering	Information Technology	Operations Management	Research, Development, and Evaluation	Training and Technical Assistance
Federal Civilian Government	•		•	•	•	•
Defense and Intelligence Agencies	•	•	•	•		•
State and Local Government	•	•	•		•	•
Public and Private Companies	•	•	•	•	•	•
Nonprofits	•		•	•		•

CAPABILITIES

Data Management and Analysis
Analytics, Big Data, Collection, Data Engineering, Governance, Migration, Privacy and Security, Quality and Validation, Standards, Strategies, Visualization and Reporting, Warehousing

Engineering
Building Automation Systems, System Commissioning, Power Quality Monitoring, Energy Engineering, HVAC and Electrical Systems Design, Maintenance Planning, Probability-based Risk and Resilience Assessment, Arc Flash and Electrical Coordination Studies, Facility Information Systems Integration Support, Water Treatment System Design and Operations, Transportation System Performance Analysis

Information Technology
Business Process Management and Reengineering, Cloud Enablement, Cybersecurity, Data Engineering and Data Science, DevOps, Enterprise Integration, Internet of Things (IoT), Managed Services, Microservices, Software Development and Maintenance

Operations Management
Agile Methodology, Business Process Evaluation / Gap Analysis, Organizational Strategic Planning, Process Documentation and Templates, Process Improvement, Project Management, SCAMPI Appraisals for Development, SCAMPI Appraisals for Services

Research, Development, and Evaluation
Big Data Analysis, Computer Modeling and Simulation, Customer Research (Surveys, Focus Groups, Interviews), Data Visualization, Development of Technical Guidance, Mixed-Methods Research, Monitoring and Evaluation, Multi-criteria Analysis, Qualitative Methodologies, Quantitative Methodologies

Training and Technical Assistance
Content Expertise, Communities of Practice and Webinars, Individualized Supports, Needs Assessment, Peer Exchanges and Workshops, Publications and Social Media, Regional and National Convenings

TRANSPORTATION

IT CONSULTING

1,000,000 children enrolled in programs that meet measures of high quality through support of 20 states.

30% fewer federal staff needed for reviews.

\$1 billion+ federal grants managed.

17% less time to review submissions.

AEM developed an IT platform to efficiently manage government grants.

1,000,000 homes tracked for Department of Defense around the world.

4,000,000 logins each year to secure systems managed for Department of Defense.

288 embassies and consulates supported with engineering and IT services.

620,000 water sector assets assessed (including treatment plants, pumping stations, storage tanks, and piping) to reduce the impact of future manmade and natural disaster.

100,000 transportation assets analyzed (including roads, highways, and bridges) to reduce the impact of future manmade and natural disaster.

50 damaged transportation sites analyzed post-disaster to assist with allocation of \$200M+ in funding.

\$1,000,000 annual software licensing savings for Fortune 500 company through custom software development/integration.

99.98% reduction in server provisioning and configuration time for a Fortune 500 company through DevOps engineering.

\$6,000,000 annual Opex savings for medical services provider through business process and rules engineering.
