

VIZURI

# ENTERPRISE INTEGRATION CONSULTING

## INTEGRATE AND ELEVATE YOUR BUSINESS

### LEVERAGE LEGACY ASSETS

Sustain the value and functionality of your legacy assets in a cloud environment— without having to “rip and replace” or rebuild them from scratch.

### STREAMLINE BUSINESS PROCESSES

Increase your organizational agility, flexibility, and maintainability through streamlined business processes. Integrate systems and applications and create a repository for centralized business rules.

### IMPROVE USER EXPERIENCE

Increase customer satisfaction. Provide a seamless experience with easier, more secure, and more flexible integration with third-party applications.

## **BUSINESS PROBLEM**

---

As organizations attempt to modernize their processes, they're faced with a widening divide between new tools and legacy systems that can't easily be replaced. This impacts essential business needs, as an inefficient mix of processes quickly siloes departments.

## **SOLUTION**

---

With end-to-end integration, you can leverage legacy systems along with the new tools and technologies you need to stay competitive in the marketplace. A fully integrated ecosystem facilitates consistent processes throughout the organization and allows for simpler and more effective management and maintenance.

## **HOW CAN VIZURI HELP?**

---

As a top-tier IT consultancy, we're experts at solving complex business problems with cutting-edge technology— all while taking a nimble, strategic approach to leveraging your IT assets. We modernize what is necessary, and we intelligently integrate the rest. Our team of industry-leading specialists will work with you to develop an enterprise integration roadmap, clearly defining where you need to go and how to get you there.

Vizuri began in 2002 as the innovation hub of AEM Corporation, an established federal systems integrator and one of America's fastest-growing companies. As technologies and standards have evolved, Vizuri has invested heavily in diverse capabilities to benefit AEM's diverse private- and public-sector clients.

# Service Offerings

ADVANCE YOUR DIGITAL BUSINESS TRANSFORMATION INITIATIVES.

LEVERAGE WORLDCLASS EXPERIENCE ADDRESSING SIMILAR CHALLENGES.

Our team has extensive experience with leading messaging platforms.

We have successfully integrated with legacy assets that use IBM iSeries, AS400, IBM DB2, and Cobol.

By integrating JBoss Fuse and Salesforce, Vizuri saved one Fortune 500 company \$1 million a year in third-party licensing.

SERVICE NAME	DESCRIPTION
<b>ASSESS</b>	
	These service offerings are designed to help you with strategic planning. They focus on assessing your organization's existing environments or readiness and providing recommendations based on best practices.
<b>Enterprise Application Integration Assessment</b>	Provide an analysis of the tools, processes and approaches your business currently utilizes to support enterprise integration and provide an Enterprise Application Integration Road Map for your organization.
<b>Microservice Assessment</b>	Examine current Microservice Architecture and existing integration strategies and provide recommendations based on best practices.
<b>Fuse Health Check Assessment</b>	Review your Fuse installation, including configuration, feature utilization, and performance to validate design and provide recommendations on opportunities for operational and performance improvements.
<b>ARCHITECT</b>	
	These service offerings are designed to help you with the adoption and implementation.
<b>Microservices Jumpstart</b>	Install and develop an infrastructure for creating Microservices and deploy several sample microservices in an environment to demonstrate the Microservice architecture capabilities.
<b>Fuse Jumpstart</b>	Install product and create sample application to demonstrate core features and capabilities.
<b>Enterprise Integration Tracer Bullet</b>	Provide concrete end-to-end integration example that defines a specific integration scenario. Build solution that integrates with existing systems and demonstrates: <ul style="list-style-type: none"><li>• Service Consumer Endpoint Configuration</li><li>• Service Orchestration Implementation</li><li>• Service Producer Endpoint Configuration</li></ul>
<b>Other Consulting Services</b>	<ul style="list-style-type: none"><li>• Expert consulting</li><li>• Turn key/mixed team approaches</li><li>• Migration efforts</li></ul>

We work with clients in a broad range of industries including healthcare, retail, finance, insurance, and government. We understand and have experience meeting the challenges associated with integrating complex systems via the principles of service orchestration.
