CLOUD ENABLEMENT CONSULTING

INCREASE YOUR BUSINESS FLEXIBILITY AND AGILITY

ACCELERATE CLOUD ADOPTION

Implement cloud-based solutions across public, private and hybrid environments quickly and safely for faster application delivery, simplified management, and streamlined business processes.

INCREASE BUSINESS FLEXIBILITY

Give your business the freedom and flexibility to package, manage, test, and deploy—wherever and whenever needed. Integrate key business applications with cloud services.business rules.

IMPROVE DEPLOYMEN VISIBILITY

With an integrated view of application deployments, you can simplify management of your infrastructure and consolidate or retire any resources that aren't in use.

BUSINESS PROBLEM

Moving bits and pieces into the Cloud is easy, but strategically moving tools and business processes to the cloud in a holistic fashion is a complex and resource-intensive undertaking. Even once there, many organizations still wonder how to leverage its full potential or second-guess if they chose the optimal cloud path.

SOLUTION

Migrating applications to a cloud environment simplifies their management, increases deployment visibility, and makes it easier to ensure compliance. When leveraging Vizuri's cloud enablement services, you have the full support of an expert partner with helpful guidance, best practices, and real-world experience.

Armed with essential skills and strategic partnerships with leading cloud technology companies, we advise on and implement secure, flexible, scalable, and cost-effective cloud solutions. With Vizuri by your side, you will be able to:

HOW CAN VIZURI HELP?

- Deploy to any cloud through Docker containerization
- Customize public, private, or hybrid cloud solutions
- Create and deploy applications quickly and consistently through automation
- Integrate a host of services to help streamline the provisioning and proactive management of your IT assets

Vizuri began in 2002 as the innovation hub of AEM Corporation, an established federal systems integrator and one of America's fastest-growing companies. As technologies and standards have evolved, Vizuri has invested heavily in diverse capabilities to benefit AEM's diverse private- and public-sector clients.

Service Offerings

ADVANCE YOUR DIGITAL BUSINESS TRANSFORMATION INITIATIVES.

LEVERAGE WORLDCLASS EXPERIENCE ADDRESSING SIMILAR CHALLENGES.

We offer expertise in all major cloud platforms. Notably, our team has been working with OpenShift since its introduction. We are also regular participants in the OpenShift Commons.

Our service offerings are focused on getting our clients up and running with cloud environments quickly. We aim to set up new application environments quickly so you can start deploying your applications.

SERVICE NAME	DESCRIPTION
ASSESS	
OpenShift Readiness Assessment	Assess your application environment's readiness for migrating to an OpenShift environment. Vizuri will provide recommendations and an implementation roadmap as part of this assessment.
ARCHITECT	
OpenShift Migration	Identify and migrate your candidate applications to your OpenShift Enterprise environment.
OpenShift Adoption Jumpstart	Accelerate the rollout and reduce the risk of moving to an OpenShift application development environment.
OpenShift Application Development	Develop multi-tier applications for running within OpenShift.
OpenShift Enhancement	Augment and enhance your OpenShift Enterprise environment. Includes the creation and deployment of additional template instant applications, services, and frameworks for enhancing your environment.
AUGMENT	
Cloud & Container Management	Assist you in gaining deeper insight into the costs, utilization and performance of your existing cloud and container environments. Provide integration services to help streamline the provisioning and proactive management of your environments.
OpenShift Infrastructure & Service Monitoring	Implement monitoring solutions for yourcontainer management environment. Start with a basic install and setup. Additional consulting services for customizing operations workflows is also available.
OpenShift Application Monitoring	Implement a monitoring solution for your application within a container management environment. This specifically focuses on how to manage application performance within your environment.

We work with clients in a broad range of industries including healthcare, retail, finance, insurance, and government.
