

Kuwait Petroleum Corporation

Working with Taxback International has taken away the headache of data gathering and learning rules and regulations. The service is thorough, professional and Kuwait Petroleum Corporation are safe in the knowledge that we are compliant and transparent in all six entities that Taxback International deal with on our behalf.

For the last 5 years Taxback International has stood out from competitors across a range of values including technology, expertise and innovation. Even without the use of an expense management system, Taxback International were able to seamlessly pull data for FVR reclaim and DVR deductions. The service is something that we have come to rely on and now could not do without.

Taxback International auditors ensure every single invoice is audited remotely, highlighting all the eligible transactions for VAT reclaim. Incompliant invoices are identified and sent back to the supplier for correction. Missing invoices are identified and retrieved from suppliers. This ensures that we are fully maximising our VAT recovery potential. Throughout the whole process, Taxback International's single Key Account Manager ensures minimal touch points for Kuwait Petroleum Corporation staff and minimal disruptions to their own operational processes.

Manager Finance – HO.
