## WESTFORD TRAIL PROJECT

*"We are socially and environmentally responsible and strive to make our effect on the world and people around us better than when we arrived." - iuvo Technologies Core Value*

The Lyberty Trail in Westford, MA is accessible behind the 238 Littleton Rd building. The back left corner of the parking lot has an access road that connects to the neighboring parking lot. On the right of that is the beginning of the trail that leads to the Westford Lyberty trail.

To live out one our core values above, iuvo Technologies started a project to clear and mark these trails so that the neighboring community can use them. There are Red and Yellow markers along the trail and it provides a shaded and clear area to walk or hike nearby to adjacent businesses. Phase 2 of the projects may be to repair and/create some bridges along the route to complete the loop, but it is now currently usable and accessible.

Enjoy the trail, get some exercise and perhaps conduct an outdoor walking meeting on the trail.

iuvo Technologies is an IT managed services and consulting company with headquarters in Westford, MA.
