

Variance Monitor training

Course duration: 2 Day

This course will provide you with the knowledge and confidence to use Variance Monitor for the verification of data between SAP clients or files, after any data take-on or configuration changes, SAP Upgrades/support packs testing, or normal day-to-day comparison needs. You will be given the opportunity to address some of your specific business comparison requirements and help you to think “out-of-the-box” when comparing data.

Course agenda:

- **When and how to use Variance Monitor?**
- **Creating payroll comparisons**
 - Comparing wage type amounts between periods or different systems
 - Multiple rule comparisons and using the Rule Network
- **Comparison selection screen options and -output**
 - Specifics around selection screen structure and parameters
 - Understanding the different output layouts and how to interpret the statistics
- **Master data comparisons**
 - Comparing Info type data. (Single or multiple fields)
- **Other type of Comparisons**
 - TIME comparison
 - FI Postings
- **Creating File comparisons**
 - Legacy files using the legacy link designer
 - SAP files using the File Export program logic
- **Creating/using user functions**
 - Comparing one-to-many objects
 - Advanced rules
- **Using constants in comparisons**
