

Dust away the cobwebs from your old SAP[®] data

Expensive, out-of-date SAP systems can be something in the past. EPI-USE Labs has partnered with EMC to bring you Object Extractor for InfoArchive.

Decommissioning SAP® systems is not something most people want to take on. Many companies will retain their old outdated legacy SAP systems for fear they would need the data for auditing or referencing in the future. This becomes very expensive. Maintenance contracts on legacy systems together with the risk of unsupported hardware failures add up to escalating costs.

The SAP environment is also changing and there are large incentives to move to S4Hana® technology or to look at SAP SuccessFactors to leverage the cloud. Moving to different ERP systems, other than SAP, is another possibility.

What if you could create a copy of the data needed for referencing without paying the large overheads and running costs? This is why EPI-USE Labs have partnered with EMC to develop an Object Extractor for InfoArchive®.

Why EMC?

InfoArchive by EMC is a revolutionary archiving solution that gives you an intelligent read-only version of your content. It allows you the flexibility of keeping your data without the overheads and the large costs involved. It also presents an excellent HTML interface and there is no need to train employees on old SAP operations.

What can we do for you?

Our team of experts will assist you

- with the extraction of data needed for archiving
- with extracting data to the format needed for InfoArchive
- with extracting from your productive environment before moving to SAP HANA
- with retiring an out-of-date system

The result? You will be able to access the data you need when you need it. Once the system is in place, you can use InfoArchive to search, view and analyse archived data using a normal web browser.

You get:

- A tried and tested solution for extracting accurate business data
- A team of experts to guide and configure the initial extraction process
- An award-winning Archiving solution
- Reduced costs with a flexible environment
- A hosting option
- Continued access to your data in the future
