

Cloud Hosting Services

Seamless cloud migration and hosting, tailored to your needs

Cloud hosting is revolutionising the way data systems are managed. Whatever your motivation for hosting your systems in the cloud, EPI-USE Labs is your hosting provider of choice.

Benefits of hosting with us

- Hosting of all your enterprise systems on one platform with secure connectivity
- A private, public or a hybrid environment as your needs demand
- A highly personalised level of service at a competitive price
- A dedicated and experienced team that will assist you in maximising the scalability cloud hosting provides
- Basic monitoring and visibility of your systems
- Complementary landscape services such as Back-up as a service, disaster recovery as a service, and sandbox in the cloud

Our multi-faceted competitive edge

- Our customized SAP Optimized VM templates enable aligning of landscapes and footprint reduction when deploying your system
- Our Unified Platform (UP) provides visibility of your systems through any device
- We protect your data through private cloud hosting and secure specialised Data Centres
- With no fixed contract option, we can provide short-term hosting solutions, for example for projects or POC testing
- We have an excellent track record for HANA implementations, including numerous productive HANA cloud instances
- We offer enterprise grade hosting at a very low industry cost, with no tiered storage; all systems run on an all-flash based system at a tier 3/4 cost. A hosted managed firewall is included, with free VPN access (ten free VPN accounts)

The iHost and iHANA hosting platform is based and powered on and by SAP-certified Fujitsu Technology. The optimum hardware specifications have been designed from a sizing and timing requirement.

The hosting platform is highly scaleable and takes the technical difficulties of server maintenance away. We also bring you increased security and higher performance than most other offerings, as we include Capacity, Backup and Disaster Recovery functionality, bundled in one. Also, the FlexFrame Orchestrator is used as the primary enablement to deploy and manage a fully virtualised SAP environment.

"At Bidvest Tank Terminals, we needed a cost-effective solution to run SAP HANA. The EPI-USE Labs platform provides us with world-class flexibility, speed and security. We are very happy with our decision to run HANA as a solution through EPI-USE Labs" - Zain Khan, Information Systems Manager

A cost-efficient, flexible migration solution

Your journey to the cloud starts with SAP migration, and we have a dedicated team to assist you with this process. We offer a scalable, flexible and highly efficient platform to migrate your SAP landscape.

During the migration we use EPI-USE Labs' Data Sync Manager (DSM) suite of products. With DSM, you can rapidly create new non-Production systems, reduce the footprint when refreshing clients, copy selected data on demand, and scramble data for security. Our comprehensive migration solution brings significantly lower costs, reduced risks and less business disruption.
