

CLOUD AND MANAGED SERVICES FOR SAP

Smart solutions for your landscape challenges

Many organizations are looking to the cloud to contain cost and complexity while providing a sustainable innovation platform for business needs. At EPI-USE Labs, we offer you a range of options – from efficient cloud hosting to fully comprehensive managed services. With powerful solutions, experienced people and cutting-edge products, we help you reduce your IT cost of ownership, increase operational efficiency and effectiveness, improve your data privacy and compliance objectives, and focus on core business innovation.

Agility, efficiency and lower costs

Taking your SAP system to the cloud gives you agility, elasticity and saves costs. In our experience, moving to the cloud achieves overall estimated savings of 37% from traditional on-premise platforms, while giving you flexibility, scalability, operational efficiency and streamlined processes.

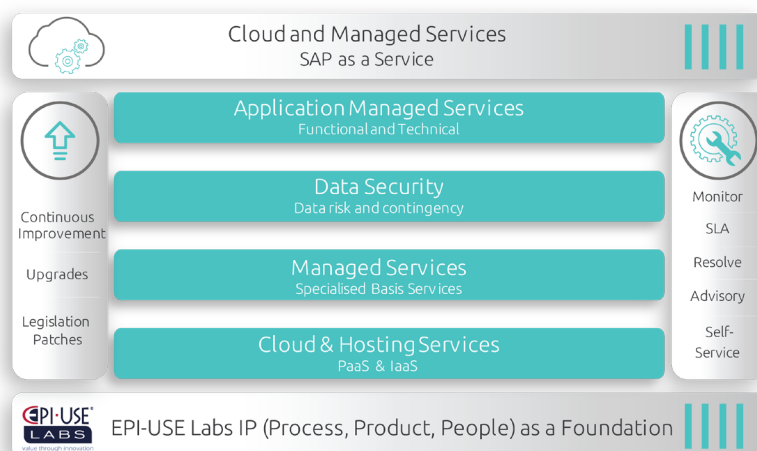

SAP Managed Services

- Partial or full SAP Basis Managed Service
- Full management of SAP including S/4HANA
- Global ITIL Service Model using Client Central™
- SAP Monitoring and Alerting using Unified Platform™
- Fully managed Migrations using Data Sync Manager™
- SAP Landscape Transformation services

Cloud Infrastructure

- Private, Public, or Hybrid Cloud Infrastructure
- SAP workloads including HANA and non-HANA
- Non-SAP workloads across Linux and Windows
- Disaster Recovery including Geo-Redundancy
- Full networking connectivity deployment
- Onboarding technical resources

Our People, Our Software:

30+ years of intellectual property to help you get the most out of your investment

Skilled, certified consultants in our global Managed Services centers have extensive experience of SAP and its infrastructure.

They also have an in-depth understanding of how our game-changing product suite, Data Sync Manager™, can benefit your system - and your business. We bring you lean and flexible solutions to transform your SAP landscape, and the ability to scramble data and reduce your data footprint, with security built in to the process. You'll get additional landscape management capability with added visibility, reducing your risks. And you'll be better placed should you choose to move to S/4HANA, as well as complying with data privacy regulations.

- Added value: SAP-certified data management, SAP HCM and SAP data privacy suites can be bundled with our cloud offering
- Innovative multi-cloud monitoring, automation and self-service software solution, purpose-built for SAP
- Everything we do is available as a subscription service

Rather than offer ready-packaged solutions, we choose a more individual approach. We listen carefully to determine your needs, then work with you to tailor bespoke solutions from our comprehensive service catalog to suit your company, both now and in the future. Whatever your challenge, we will help you solve it.

Business Benefits

- Professional service with personalized, flexible SLA customized to your specific requirements
- Everything we do is centered around security, privacy and compliance through our IP, processes and people
- We will help you reduce your TCO while embracing agility!

Purdue University, USA

"The Purdue/EPI-USE partnership already has a reputation amongst peers as one that is transforming how higher education does business. The EPI-USE team's ability to enable streamlined business process with the newest technology and user experience is unparalleled. The EPI-USE group of companies uses their broad industry experiences and technology vision to drive higher education into the future."

- Victoria Farnsworth,
Executive Director, IT Enterprise

Bidvest Tank Terminals, RSA

"At Bidvest Tank Terminals, we needed a cost-effective solution to run SAP HANA. The EPI-USE Labs platform provides us with world-class flexibility, speed and security. We are very happy with our decision to run HANA as a solution through EPI-USE Labs."

- Zain Khan, Information Systems Manager,
Bidvest

Aberdare Cables, RSA

"EPI-USE Labs helped us implement our SAP roadmap, and the team is always available when we need them. We achieved upgrades into the HANA space within short timelines and at low costs; the migration was seamless with no interruptions in work. We now have efficient technical support and effective IT management tools."

- Raven Mahabeer, General Manager: Information
Management

SAP® Certified
Integration with SAP® S/4HANA
