

## Work with your SAP HCM Data *Live* in Excel

Quickly produce and analyze SAP HCM reports with the power of Query Manager and the flexibility of Microsoft Excel

Using our Microsoft-based app makes it easy to refresh, analyze, share, and present your critical SAP HCM data when and how you need it. Empower your end-users with live SAP<sup>®</sup> HCM data in a format they are familiar with, Microsoft Excel.

- Do you like manipulating your data in Microsoft Excel?  
You can use our Query Manager Microsoft Plug-in and make all the changes you want to the Excel spreadsheet, and then refresh the data
- End-users can work with their SAP reports in their familiar Microsoft Excel, instead of in SAP
- Leverage Excel functionality including pivot tables, color formatting, charts, graphs etc – all with your live SAP HCM data

The Excel functionality is available as part of the Query Manager solution, and it is just one of our Microsoft integration options that we deliver, making it easier for customers to work with their data. What is unique about this web app is that once you have built an Excel worksheet with all the formatting and formulas that you need, you can simply hit a button to refresh your spreadsheet with live data from SAP.

## Benefits

- Saves time

- Saves the manual effort of running a Query, saving the results to Excel, opening the file and then manipulating it from there

- Allows you to add more than one Query to the same Excel workbook

- Refreshes the data from your SAP system in one click; it will automatically fetch the latest data from all the Queries

- Gives the user the ability to send the Excel file to other users, who can then refresh the file with the latest data with a simple click (requires an SAP login to fetch new data)

- Combines the power of Query Manager's extensive HCM knowledge with the ease and power of Excel for data manipulation, for example, using pivot tables and Excel charts/graphs

- Automates your Excel reports; no more uploading and downloading data between systems

- Negates the need to send the latest copy of data for recipients; they can just open up their Excel and click "refresh"

## Powered By Query Manager

Query Manager™ is a powerful, flexible, easy-to-use solution that solves your reporting challenges, allowing you to extract accurate, meaningful and real-time information from all of your SAP HCM and Payroll data.

The brilliance of Query Manager is that it empowers you to:

- access all your data from a single solution in SAP
- create your own professional reports and documents without reliance on technical resources
- streamline your business HCM reporting.

Used by thousands of people around the world, Query Manager was developed as a solution for business and HR leaders to facilitate professional HCM reporting. Query Manager with Document Builder™ is certified as powered by SAP NetWeaver.

## Users?

- HR and Payroll Professionals
- Existing users of Query Manager – especially those that love Excel as well.

## Our software, your advantage
