

# NODEUM

At Nodeum, we don't just care about Storage & Data Management.  
We care about your autonomy and your agility.

Nodeum is an innovative storage data management software which unifies business pipelines and storage tiers. This allows the transformation of infrastructure to be hybrid and combine NAS, Object, Cloud and Tapes Storages into one solution.

It enables users to store and retrieve massive amounts of data easily. The interface is easy-to-use, intuitive and provides a 360° view of all of your storage. Furthermore, the application has an intelligent catalogue. With metadata, you classify and organize your data to improve searches. The use of different storage technologies provides advanced transportability and storage functionalities at a low TCO. Nodeum is the solution to anticipate the upcoming and rapid growth of digital data.

## NODEUM'S INNOVATIVE STORAGE DATA MANAGEMENT SOFTWARE PROVIDES THE FOLLOWING UNIQUE FEATURES

Hybrid Storage Management  
(NAS, Object, Cloud, Tape)

Searchable content catalog

Public RESTful API

Policy-Based Workflow Manager

Integration with Cloud  
ML/AI platforms

Reporting & Analysis

TCO Simulator

Software-Defined

Highly Scalable

Intuitive Interface

Metadata Management

# Explosion of data volumes

Genomics analyses have become much more affordable over the recent years. Leading research centres and hospitals are acquiring more specific equipment for these applications. On top of this, these workflows are now being used for more diagnostic purposes, creating an even greater acceleration in data being generated.

All this data is being made available to researchers and medical staff for analysis and kept for an ever-increasing storage period. Terms of 20 years are no longer an exception and it is expected that even longer periods will be required in the future.

Nodeum responds to this explosive demand for the large-scale storage and archival with a highly innovative solution that makes these storage challenges easy and facilitates data movement to ensure a long-term viable data platform.
