

2016 Kia K900

Shift-lock Override

If the shift lever cannot be moved from the P (Park) or N (Neutral) position into the R (Reverse) position with the brake pedal depressed, continue depressing the brake, then do the following:

1. Carefully remove the cap (1) covering the shift-lock access hole.
2. Insert a screwdriver into the access hole and press down on the screwdriver.
3. Move the shift lever.
4. Have your vehicle inspected by an authorized K900 Kia dealer immediately.

Good driving practices

- + Never move the shift lever from P (Park) or N (Neutral) to any other position with the accelerator pedal depressed.
- + Never move the shift lever into P (Park) when the vehicle is in motion.
- + Slow down before shifting to a lower gear. Otherwise, the lower gear may not be engaged.
- + Always use the parking brake. Do not depend on placing the transaxle in P (Park) to keep the vehicle from moving.
- + Optimum vehicle performance and economy is obtained by smoothly depressing and releasing the accelerator pedal.

Moving up a steep grade from a standing start.

To move up a steep grade from a standing start, depress the brake pedal, shift the shift lever to D (Drive). Select the appropriate gear depending on load weight and steepness of the grade, and release the parking brake. Depress the accelerator gradually while releasing the service brakes.
