

2019–2023 Porsche Cayenne & Macan

Collapsible Spare Tire

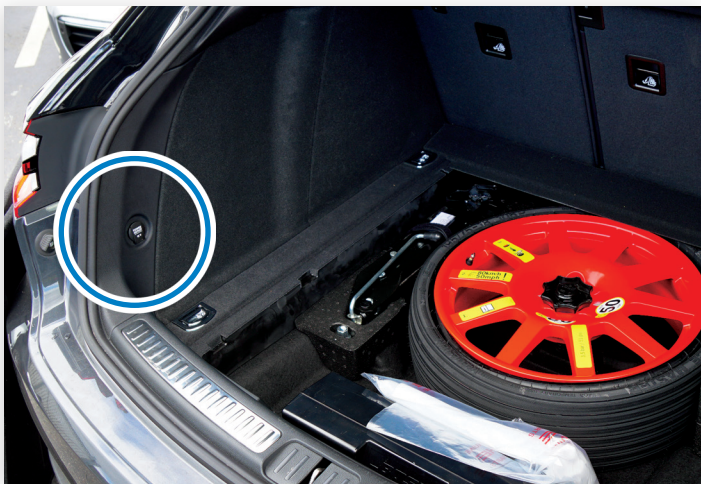

Compressor Locations

Porsche Cayenne

Porsche Macan

12-volt power source in cargo area

Connect the air line to the valve stem plug in the compressor to the power point in the cargo area.

The vehicle's ignition will need to be placed in the "ON" position to energize the 12-volt power point in the cargo area.

The tire is designed to be filled lying on its back and with the air compressor provided in the vehicle.

The tire will look unusual as it deploys while being filled.

Total fill time with supplied compressor should be around 10 minutes.

Fill tire to recommended tire pressure specs.

Recommended tire pressure specification can be found on the tire pressure tag in the driver door jamb.
