BCN stool family by Kristalia

+ BCN stool family

Kristalia

The BCN stools have been created thanks to ongoing research into new materials and technologies. The seat, visibly sinuous with an ergonomic feel, is made of PBT, a highly flexible and durable thermoplastic material, which is put to unusual use in the world of design. Various versions are available: high, low or medium, with a chrome-plated steel structure or in the same colour as the seat, with a height-adjustable structure with a gas-lift device, and a new version with lathe-turned beech wood legs.

Features

- Chairs available with Disc Base, Slide Base or Wood Base
- Available in Black, White, Green and Red
- Some versions suitable for outdoor use

Lead time

4-6 working weeks

Warranty

5 years
