INNOVATION. ARTISTRY. PERFORMANCE.

Inspired by advances in materials science, Steelcase created SILQ™—a breakthrough in seating design. With an innovative materiality that is both mechanism and artistry, the way SILQ is sculpted, the way it performs and what it's made of are inseparable.

SILQ delivers a personal experience that responds to the unique movements of your body and its wide range of material combinations create a canvas for personal expression. When you sit in it, you become a part of it.

17-0098278

INNOVATION

Our vision with SILQ was clear. We wanted to create a chair that's simple, rather than a complex machine; one that operates intuitively and invites the human body to participate in the experience. Through a materials science breakthrough, our engineers developed a unique material process that embodies the performance qualities of carbon fiber and allows us to deliver on our aspiration. This new material process comes together in a flexible system behaving as a cohesive mechanism.

Inspiration

We took inspiration from the aerospace industry and the motion of a high-performance prosthetic leg and sculpture — among other things — to understand how the combination of advanced materials and shape could create a simple system that is incredibly thin, extremely strong and highly responsive. By replacing the hundreds of parts needed for a fully adjustable chair with a simple system, the material becomes the mechanism.

18-0099862 | SILQ CHAIR (6053, 4140, HALLINGDAL 65 1109)

ARTISTRY

SILQ is both sculptural and sophisticated in design. The simplistic nature of the chair creates a canvas for individual expression. It offers an unprecedented range of material options allowing you to move from one end of the design spectrum to the other and create a chair unique to you.

Colour scheme

Available in carbon fiber and the new high-performance polymer, the range of materials is unprecedented.

PERFORMANCE

SILQ feels as good as it looks. It is designed to move the way you do.

As you sit down and recline, SILQ responds to your body's natural movement making you feel like you're a part of it.

Height is the only adjustment necessary for a tailored and unique experience.

You don't sit on SILQ, you're a part of it.

17-0097410 | SILQ CHAIR (6053, 4140, KVADRAT BOLDER 3), MEDIA:SCAPE TABLE (7360)

Applications

The way we work today is dynamic. With meetings spanning across campuses and time zones, we need a chair that's minimal, versatile and suited for beautiful spaces. SILQ does this while supporting work in collaborative meeting spaces, conference rooms, nomadic benching environments and touchdown spaces.

DESIGNING FOR THE ENVIRONMENT REQUIRES INNOVATIVE THINKING AND SOLUTIONS.

At its heart, sustainability at Steelcase is about people. It's about creating and supporting the economic, environmental and social conditions that allow people and communities to reach their full potential.

Research and insights direct our path. It's not only about creating goods, it's about creating good. It's not only about creating value, it's about living our values. It's not just about reducing our footprint, it's about expanding our reach. It's about creating lasting and meaningful change to enable the long-term wellbeing of current and future generations.

Innovative products and solutions result. In the development of our products, we work to consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life. We demonstrate performance through third-party verified certifications and voluntary product declarations.

Steelcase's sustainability promises, actions, and results are communicated in an annual Corporate Sustainability Report.
