Pars & Obvio

meeting tables

active tables

Central to our innovative Smartworking portfolio are the **Pars** meeting tables & **Obvio** active tables

Delivering a comprehensive programme of design and function options, quality and value.

Answering your current needs.

Meeting the changes of tomorrow.

5 x top shapes

5 x veneer options with five edge profiles

5 x melamine top options with two edge profiles

3 x leg designs

Additionally our in house tabling team can design and realise bespoke configurations to meet your precise project needs.

Pars | I-frame

Pars meeting tables can be specified in our standard melamine range of five finishes and two edge profiles or our quality hand selected five real wood veneers with five edge profiles.

Photographed is the 4000mm X 1400mm Barrel top with a chamfered solid timber edge in Walnut, combined with our polished aluminium and black I-frame.

Two veneered hinged hatches allow access to the power boxes with power|data units. These are fed via a column mounted cable riser or a translucent plastic umbilical cable riser which can be positioned as required.

Also shown is a selection of our two, three or four door credenza units. Each can be specified in melamine or veneer with top edge details to match your table specification. Pars credenzas have an adjustable shelf and touch catches as standard with optional locks or handles as an upcharge.

For full technical specifications please refer to our Pars technical brochure.

Pars | XY

The classic XY leg offers the specifier even more choice. All top shapes, edge profiles and top finishes are matched to the I-frame offer, but table lengths must be greater than 1600mm to accommodate the XY sub frame. Each can be specified with the Pars range matched veneered hinged hatches or satin aluminium or silver grommets.

This unique leg design is only available in bright chrome and shown are the 4000mm X 1400mm oval and 1800mm diameter round tables.

Pars | single leg

Critical to a great table range is a choice of design specifications to meet your precise needs. The Pars range excels with its diverse range of top shapes, finishes and sizes and combined with its three leg types, offers a unique design solution.

Pictured is the die cast aluminium single leg which is available in four finish options of polished, Stone, RAL 9006 silver or Black. The Pars single leg is ideal for smaller meeting tables where free leg space is critical and its sculptured form provides yet another contemporary leg option to the Pars range. The Single leg can also further enhance the status that a Pars meeting, conference or boardroom table brings.

Combinations of these carefully chosen options allow the design and specification demands of the contemporary workplace to be easily accommodated. Each of the three leg options provide classic designs that follow the language of the expansive Orangebox Smartworking landscape and blend seamlessly into a diverse range of interior environments.

The I-frame is available as standard, as a polished aluminium base on a black column or all silver in RAL 9006. All chrome or the unique Orangebox contemporary stone finish are available as a customer special. The single leg is available in polished aluminium, RAL 9006 silver, stone or black and both the ski and single legs have a levelling black glide. The XY leg is available only in polished chrome.

At Orangebox we know that each designed environment will have a different technological demand and to accommodate this we offer five different access options to include matching veneer, all aluminium, aluminium with a discreet plastic frame, all plastic grommets and all aluminium grommets.

All of which can be populated with configurations of power and data including International outlets. Please refer to the full Pars technical brochure for more detailed information of these units.

Obvio | active tables

The traditional needs of classroom and conference environments have become increasingly more diverse and demanding. Obvio's range and function meet these demands while still offering the same design quality and finish as Pars.

Ensuring you can combine any of the Smartworking tables with confidence knowing that the consistent and unifying design language is shared across the ranges.

Obvio active flip top tables are built off a unique and robust mechanism meaning that even with a 2400mm X 900mm top, Obvio still meets the rigorous demands of strength, stability, and constant reconfiguration.

Power and data can be seamlessly integrated allowing the most complex technology requirements to be configured with the same 'plug-in and play' ethos as the Smartworking Celo work tables.

Obvio | active tables

Flip top 'plug – in and play' and store easily.

A diversity of top shapes and sizes combined with the flip top mechanism are designed to meet whatever configuration layouts you require.

The robust and easy to use linking brackets, cable trays, power\data units and cable bridges also mean that you are able to quickly configure and re configure Obvio to your exact needs.

For the full technical specifications and capabilities of the Obvio range please refer to our Obvio technical brochure.

Classic Credenzas

The classic Pars credenza lives up to its name as a quality cabinet that perfectly complements our tabling offer. The two, three or four door units are 650mm deep, have standard interior configurations which can easily be customised to more precise requirements if required.

Pars credenzas have a square edged top as standard or can be specified with a chamfered edge or a feature solid wood chamfered edge to match the Pars tables. The doors have touch catches and can be customised with locks if required. Cable ports can also be added to allow discrete cable access to the top of the unit.

Each credenza comes with a shelf as standard but can be specially adapted to accommodate Fridges and AV equipment and their specific power and ventilation requirements.

Design quality & hand selected finishes

Come as standard with the Pars and Obvio ranges but to fully appreciate their value and performance nothing can beat a visit to our showrooms.

Detailing is vital and as the adjacent images illustrate our range covers a breadth of choice in top finishes and edge profiles to meet the most demanding of interiors.

We know that confidence in selecting the correct tabling combinations for your project is critical and so samples and more detailed technical information are easily available via our sales network.

We also know that sometimes you have to go just that little bit further. So through our sales team you can collaborate with Orangebox design and development to quickly achieve customer special designs and finishes to achieve a more bespoke solution

Melamine top finishes
