MindLink

Secure Mobile Messaging & Collaboration

Users can set up dedicated chat groups per topic/project for real-time sharing of information, data, files, links etc. Live information feeds from social media, Email and other line-of-business systems can be streamed to any topic group to provide context and allow for enhanced decision making.

Conversations are indexed and recorded - meaning organizational knowledge is preserved and searchable for future use. MindLink for iOS offers advanced filtering capabilities to avoid information overload.
