

Secure Messaging & Collaboration integrated with Microsoft Lync™ & Skype for Business

MindLink for AirWatch is a powerful Chat & Messaging solution offering state-of-the-art enterprise collaboration and data security to corporate users. Integrated with Microsoft Lync™ & Skype for Business, the MindLink collaboration platform allows users to disseminate information & data real-time across the business and stay connected with colleagues across geographically dispersed teams whilst on-the-go.

MindLink offers all collaboration features: presence, instant messaging, group chat, file sharing & archiving and voice capabilities (coming soon), combined with regulatory compliance, advanced system integration to provide relevant content to users and secure mobility – ideal for corporate BYOD/ CYOD/ COPE strategies.

Key Features

- **Cross-Platform Messaging**
Use MindLink messaging across Windows, Mac & Linux
- **Mobile Collaboration**
Stay connected and collaborate whilst on the move on your mobile devices on iOS, Android and BlackBerry on mobile & tablet
- **Secure Enterprise Chat**
Share information securely without the risk of data leaks or breaches. Amongst other things, data is encrypted, users are authenticated and data can be wiped or revoked remotely via EMM/ MAM support
- **Advanced Integrations**
Social Media, Email, Portal integration as well as RESTful API to connect to any line-of-business system
- **Out-of-the-box Compliance**
Instant Messaging & Group Chat messages/attachments can be routed to legally compliant long-term storage facilities
- **Enterprise Features**
Live Stream, #Hashtags, @Mentions, Advanced Filters & Search, Push Notifications, Critical IM, Group Links, Inline Imagery ...

Availability

MindLink is a Microsoft Gold Communications Partner and fully compatible with Microsoft OCS 2007R2, Lync 2010, Lync 2013 and Skype for Business 2015.

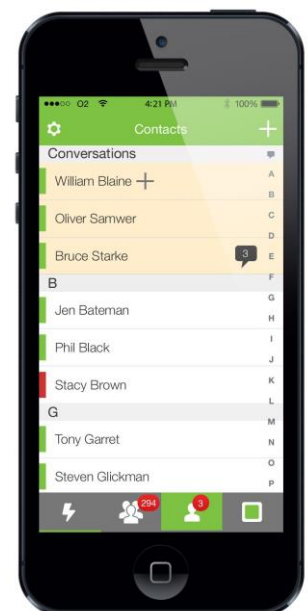

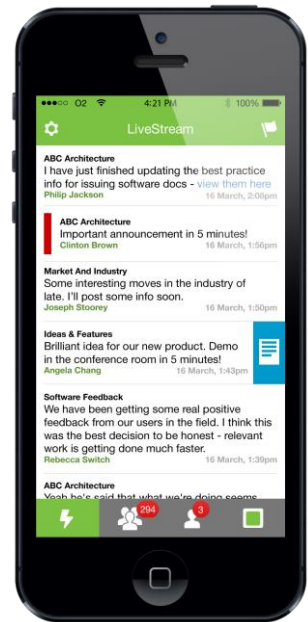

The MindLink app can be downloaded from the Apple AppStore, Google Play and Blackberry World.

Secure Messaging & Collaboration

Users can set up dedicated chat groups per topic/project for real-time sharing of information, data, files, links etc. Live information feeds from social media, Email and other line-of-business systems can be streamed to any topic group to provide context and allow for enhanced decision making.

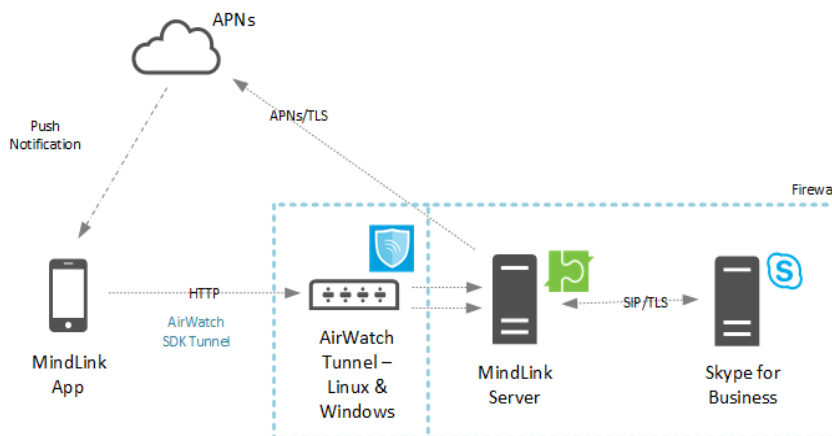

Conversations are indexed and recorded - meaning organizational knowledge is preserved and searchable for future use.

AirWatch Integration

- Enforces security policies and protects devices using AirWatch authentication
- Speeds up deployment by streamlining enrollment & configuration of MindLink server and user details
- Securely stores user information and wipes it if device is compromised
- Leverages AirWatch tunneling capabilities for accessing internal resources and MindLink server component
- Integrates with other AirWatch apps for accessing sensitive data
- Containerizes passcode access

Network Architecture

About MindLink

MindLink provides secure Chat Enabled Collaboration integrated with Microsoft Lync™ & Skype for Business, allowing teams to coordinate and exchange vital information real-time across the business.
