

CHAT ENABLED COLLABORATION ON YOUR DESKTOP

MindLink Desktop is a web-based app that brings secure messaging & collaboration on to Windows, Mac and Linux. Searchable, persistent, real-time - MindLink enables teams to share information and knowledge across the firm, significantly reduce Email volumes and improve team & project work.

The result: A collaborative enterprise that drives efficiency and productivity through better internal communication - no matter what desktop environment or operating system.

Key Benefits

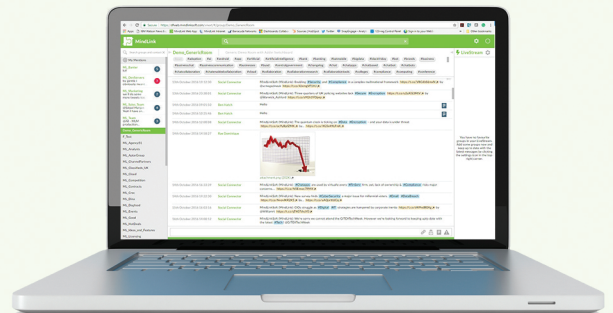

- Connect your remote & distributed teams
- Combat Email Volumes & Information Overload
- Build a searchable knowledge repository – all information shared is indexed and preserved
- Obtain real-time access to knowledge and subject matter experts across the entire firm
- Reduce meeting & travel costs

MindLink Desktop - that's:

- Presence - your availability
- Instant Messaging - ad-hoc conversations
- Group Chat - standing chat rooms
- File Sharing & Archiving
- Integration with Lync or Skype for Business
- Voice Calling (coming soon)
- Integration with Email, Social Media, Portals & any internal system

“Whether they are sitting next to each other or working in offices separated by thousands of miles, our teams & analysts are able to work much more cohesively, quickly, and effectively, ensuring maximum success for our investor clients”

Redburn

Share Information with Peace of Mind:
