

## Ascertia and CREAplus deliver high quality, high-trust signing solutions

### Client

# CREAplus

### Business Need

CREAplus is a company with several years of experience in consulting, implementation and software development connected to secure digital identity and data security solutions, headquartered in Ljubljana, Slovenia. The company delivers solutions and services to high-trust organisations in both the private and public sector.

The company counts many EU Qualified Trust Service Providers as customers. These providers require eIDAS compliant Qualified Signature Creation Devices (QSCDs) containing a certified Hardware Security Module (HSM) in order to provide Remote Qualified Signatures.

### Selection Process

CREAplus's main objective was to provide its customers with a robust, high-trust solution complying with the eIDAS regulation.

The team wanted a flexible, proactive partner, and as an existing partner of the leading Hardware Security Module manufacturer, Utimaco, Ascertia was the ideal choice.

CREAplus can utilise its expert knowledge of the hardware component (Utimaco's CryptoServer CP5 HSM), used as part of Ascertia's ADSS SAM Appliance, to provide technical assistance and support, from initial installation to ongoing maintenance.

### Solution

CREAplus's customers rely on a certified element necessary for setting up a complete certified environment for issuing remote digital signatures.

As Ascertia's ADSS SAM Appliance is a Common Criteria EAL4+ certified product (EN 419241-2 Protection Profile), CREApplus can offer a solution that provides eIDAS compliant Qualified Remote Signatures to its customers.

As an Ascertia partner, CREApplus adds additional value through the implementation and configuration of the ADSS SAM Appliance, which in addition to ensuring customers' compliance, delivers a smooth integration and a continuous reliable operation.

## Result

Through CREApplus and Ascertia's partnership, customers can benefit from a certified, high-trust signing solution, enhanced product delivery services, further tailored technical support and an exceptional user experience.

With this partnership CREApplus has worked with Ascertia to provide a valuable and seamless high-trust offering and extended its customer reach as a result.

“

We have a successful partnership with Ascertia, providing the best-in-class solution with its ADSS SAM Appliance to ensure high-trust, high availability services. We always engage with like-minded partners and this is why it is so easy for us to work together - because we believe in the same values and are both agile, flexible companies who strive to deliver the best service to customers.
