CloudAlert™

CloudAlert™

Restaurants | Grocery | Retail | Healthcare

The digital and mobile world has fueled the online service revolution.

Many third-party online ordering and notification apps send notifications via email. CloudAlert bridges the gap between email notifications received on an office computer and your staff working on the floor. With CloudAlert you can instantly notify your managers and staff via text (SMS) or pager when an order or notification is received so they can immediately take action.

CloudAlert picks up where many third-party apps leave off, and keeps your staff informed while staying productive on the floor.

Restaurants

Alert manager and staff when a notification is received from a third party – such as Olo or Ziosk.

Spas & Salons

Alert staff of guests' appointments.

Retail

Alert sales associates when an online order is received so they can prepare it for store pick-up.

Healthcare

Send Electronic Medical Records (EMR) and Electronic Health Records (EHR) alerts via text or pager with SmartCall Messenger and CloudAlert.

Grocery Stores

Alert clerks when an order is received so they can prepare and deliver to customers.
