

IStation
Integrated Transmitter

IStation Master Controller

The IStation is our most robust transmitter. Designed for quick and easy coordination of front-of-house and back-of-house operations, the IStation offers flexible communication with guests via SMS texting or GuestCall® pagers for the best guest experience. The IStation is designed for seamless staff and guest coordination. Data logging is effortless for capturing useful analytics such as wait times, peak hours and communication patterns.

Additional Features

Easily Integrate IStation with paging systems and software applications for complete control over your business.

Reservations

Sync the IStation with HostConcepts™ to allow guests to put themselves on your waitlist with TapAhead Seating.

Guest Communication

Use GuestCall pagers or SMS texts to notify guests that their table is ready.

Waitlist Management

Use the HostConcepts waitlist app to send alerts, track reservations, manage seating, staff and more!

Flexible Integration

Third-party POS and KDS system integration capability.

Service & Alerts

Supports TableScout™, our table status alert system enabling restaurants to turn tables faster.

Online / Mobile Orders

Never miss an online order! With CloudAlert™, you can immediately convert mobile order emails via Olo, BeyondMenu, DoorDash and others into pager alerts!

Manager & Staff Communication

Supports alpha-numeric text and server pagers to quickly notify staff.

Table Management

Customize a table layout for the host stand with HostConcepts complete restaurant management system.

Data Logging

Track and store useful data such as wait times, peak hours and pager communication behavior to streamline operations.
