

TableScout

Transmitter, Base Station & Charger

TableScout™

It's easier to run a smoother, more efficient restaurant with the help of TableScout table status alert system. The bus or host staff uses TableScout's compact, hand-held transmitter in the dining room to update the table management software system without having to walk back to the host stand. TableScout helps you turn tables faster.

TableScout integrates with a table management system to deliver timely updates. With simple controls and a portable design, TableScout is convenient and easy to use. You'll also save on labor cost, serving customers better and faster with fewer staff members. Count on TableScout to help your staff deliver the best service possible.

Additional Features

TableScout to keep the host informed of table status, resulting in faster table turns, smoother service and decreased staffing.

Simple Controls

Help staff learn to use the transmitter easily, quickly and intuitively.

More Economical

TableScout is a more cost-effective solution than handheld PDAs.

Durable Design

Withstands harsh restaurant conditions and provides reliable performance.

Faster Table Turns

Reduce guests' wait times, eliminate long lines and create a quieter ambience.

Table Management Integration

TableScout integrates with table management solutions like OpenTable, QSR Automations, and Aloha Guest Manager.

Labor Cost Savings

Helps reduce the host staff without compromising the quality of service.

Rechargeable

Just plug it into an electrical outlet and charge overnight.
