Components
- JTECH gateway
- Guest locator
- Guest locator charger
- Table tag
Step 1

Plug in the guest locator charger. Charge the guest locators for a minimum of 4 hours.
Step 2

Connect antennas to the gateway terminal. Plug in power adapter to gateway.
Step 3

In a dry area, mount and plug in tablet.

*For PC setup instructions, please contact JTECH.

Step 4

Connect gateway to tablet using the USB to mini USB cable provided.

Step 5

In a dry area, away from metal, mount the gateway.
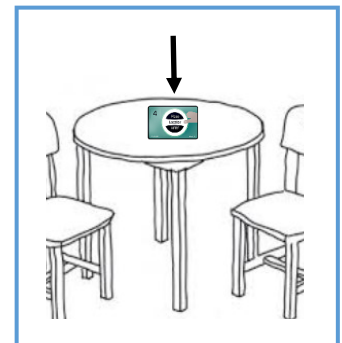

Step 6

On the PC or tablet:

Launch the EasyVu Server, then click "Yes."

Launch the EasyVu Client, then click "Yes."

Step 7

Test the system at every table using the table-tag labeled "TEST" and any guest locator. Place the "TEST" table tag on each table and place the guest locator on the table tag. Confirm that the table shows up on the tablet.

Step 8

Place the table tags on their designated tables if the test is successful.

System is ready to use!

For technical support, please contact JTECH at 800.321.6221.
