EasyVu™ Model Numbers: J1801, J1802, J1803

Introduction

EasyVu System Overview

The EasyVu System is designed to help restaurants manage their customers more effectively. As customer location information is quickly sent to the servers, food can be served before it gets cold. Prompt serving also improves the service flow of the restaurant, increasing the level of customer satisfaction.

EasyVu Workflow

A customer enters & makes an order

Receives the table info. (Gateway)

Reception cleared (Gateway)

Gets a Guest locator

Display the table info. (shows customer location)

Table disappears - Service completed.

Special Features of EasyVu 2.1

Guest Locator

- > Flashing red light alert.
- Stacks on charger for charging and setting the Guest locator ID. >

Guest locator + Table Tagging

Guest locator is taken and placed back on the charger. (Reception cleared)

EasyVu™ Model Numbers: J1801, J1802, J1803

Tagging Distance nce of Transmission an Distance of Transmission and reception reception [5~7cm] [about 200m] [about 200m] 9 NFC Constantine Table Tag CARD 1 Table Tag Guest Locator Gateway Repeater(Gateway)

- > The operating range may vary depending on the user environment.
- > The EasyVu system does not operate on metal tables. A shielding material must be placed under a Table Tag Card.

Safety Precautions

Avoid Exposure to Foreign Substances

Transmission/Reception Distances

> Avoid introducing foreign substances into products that could deteriorate or damage them.

Do Not Use if a Component is Not Functioning Properly

> If a component is not operating as expected, contact our A/S service team.

Avoid Operating in Extreme Temperatures

 Operate products within the specified ambient operating temperature range of -14°F ~ 131°F (-10°C ~ 55°C).

Never Repair Products Yourself

> Never disassemble or repair a product yourself. Repair or service must be performed by an authorized repair facility.

Avoid Physical Impacts to Products

> Failure to do so may result in accelerated wear, breakage, or malfunction of the product.

Do Not Drop Products

> Doing so may result in serious damage to the product.

EasyVu Client Settings and Features

Initial Client Software Setup

Client S/W can be installed on the same PC where the Server S/W is installed — or on a different PC — following the steps below. *Please note: If Client S/W is installed on a PC other than where the Server S/W is installed, you must install "Firebird-2.5.2.26540_0_Win32" first.*

8		- • ×
ICON SET / MAP SET	SERVER IP ADDRESS 127.0.0.1 CONNECT Call Pager Call V SEND	SET CONFIG
01-15-2018 11:00:56		
1 TABLE		
00:04:39	MAP	

- > Confirm the Server IP address using Server S/W.
- > Click the Client S/W shortcut icon. (Note: For PCs using Windows 8 or below, Adobe[®] Flash[®] Player needs to be installed please follow the instructions in the pop-up window.)
- > Input the SERVER IP ADDRESS in Client S/W and click 'Connect.'
- > If the IP address is correct, and the network connection between Server S/W and Client S/W is good, the ICON and MAP SET tab will be activated.
- > The Guest locator can now be given to customer, once the order and payment have been completed.

[Connect fail]

[Connect success]

EasyVu[™] Model Numbers: J1801, J1802, J1803

Additional Client Software Features

- > When the Guest locator is taken off the charger base, the Guest locator sends a 'Start' signal to the Gateway. The Gateway then sends the signal to the PC, and information from the corresponding Guest locator is displayed in Client S/W as a yellow 'Wait' icon.
- > When the Guest locator detects the Table tag, it flashes twice with a beeping sound.
- > The Guest locator sends location information to the Gateway, which the Gateway sends to the PC. The yellow 'Wait' Icon then changes to a green 'Seat' icon.
- > When the food is ready to be served, the staff takes the food to the location indicated on the Client S/W, collects the Guest locator, and places it back on the charger.
- > When the Guest locator is returned to the charger base, it sends a 'Clear' signal to the Gateway.
- > The Gateway receives that signal and sends it to the PC, so that the green 'Seat' icon disappears.

User Guide for Client Software

Click the 'GUID' icon for additional software feature information.

Test Mode

To Test If Gateway and Guest Locators Are Connected Within an Allowable Distance

- Using "Table Tag Write" (refer to the previous Table Tag Writer section), write 'TEST' on Table Tag.
- Place the Guest locator on the Table Tag Card (Written: TEST).
- > EasyVu Client displays 'TEST.' The Guest locator FND also reads 'TEST.'
- > If the Guest locator and Gateway are connected, the word 'TEST' on the FND of the Guest locator disappears.
- > If communication with the Gateway fails, the Guest Locator FND will keep showing 'TEST.'
- > If communication is successful and the Guest locator FND stops showing 'TEST,' the test can be repeated for other Guest locators.
