

Solutions You Can Count On

WE ARE NTM CONSULTING SERVICES

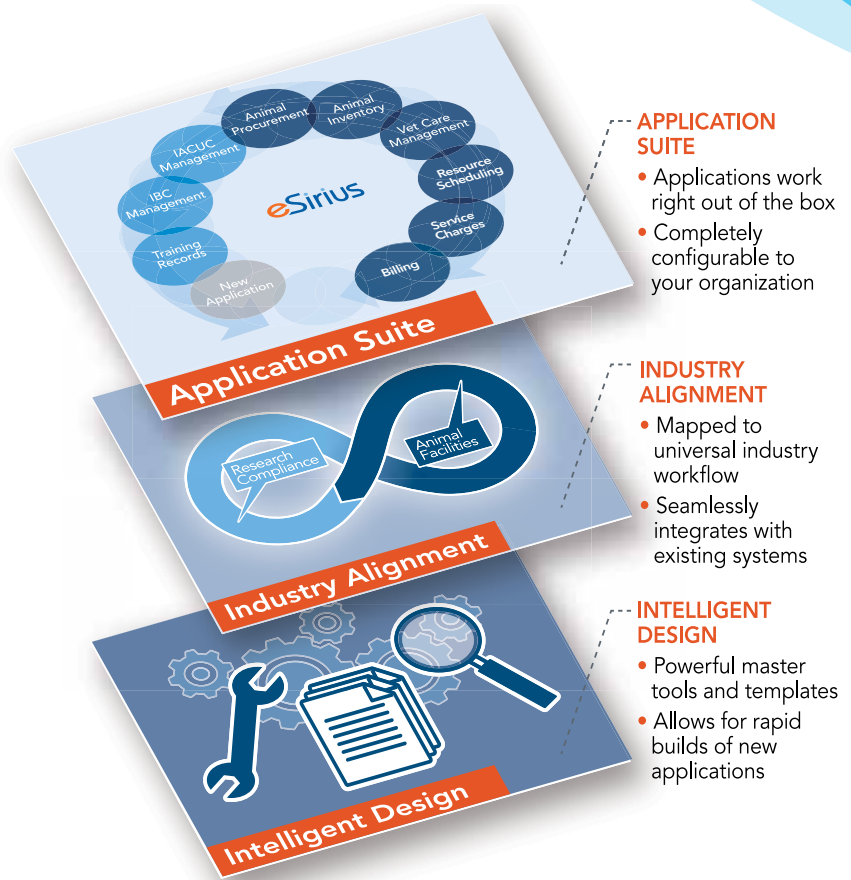

A full-service provider of software and consultative services to the Life Sciences industry. For over 25 years, NTM has simplified research compliance with the *eSirius* software offering, a suite of scalable applications supported by a dedicated professional services team.

Our customers include top NIH-funded institutions, private and governmental organizations, academic institutions, and pharmaceutical companies.

GROWTH MADE EASY

eSirius applications are built on a platform that allows you to grow without hassle. The system remains fast and responsive, even with years of data.

Our applications span the Compliance and Facility workflow and are directly integrated with each other.

APPLICATION SUITE

- Applications work right out of the box
- Completely configurable to your organization

INDUSTRY ALIGNMENT

- Mapped to universal industry workflow
- Seamlessly integrates with existing systems

INTELLIGENT DESIGN

- Powerful master tools and templates
- Allows for rapid builds of new applications

"eSirius has cut down on at least 50% of my work!"

- Department Leader, Major Research Foundation

Solutions You Can Count On

5 BENEFITS

OF USING eSirius

1. Improved compliance
2. Direct integration across entire application suite
3. Greater process efficiency
4. Fastest implementation times in the industry
5. Satisfied end users

eSirius

SCALABLE ARCHITECTURE, LAYER-BY-LAYER

Layer 1: Application Suite

The current *eSirius* suite contains 9 applications, with additional ones under development and endless future possibilities.

Layer 2: Industry Alignment

Universal industry components, such as compliance and protocol workflows, agenda management, committee meetings, and document review, are built-in, ensuring alignment with industry best practices.

Layer 3: Intelligent Design

Powerful configuration tools and templates, such as dashboards, reports, and documents, allow for efficiency and quickness in developing a new application.

"With such diverse needs, it's clearly impossible to build a system that meets each facility's program, but with the configuration flexibility of eSirius, we have only had to make a few changes to our process."
