BILLING

eSirius for Billing is a tool for completing the period close and generating electronic invoices.

eSirius for Billing enables:

DATA ACCURACY AND ACCESSIBILITY

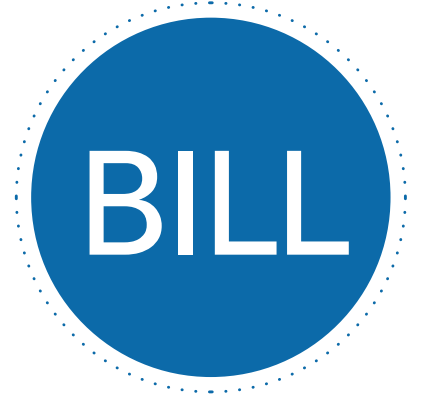

- Compiles and calculates animal purchase charges, completed service charges, veterinary care charges, and to-date care-day charges
- Researchers and business office staff can run on-demand queries of current and historical invoices

TIME SAVINGS

- Electronic invoices are automatically generated from period closes and immediately available online
- Research staff can view trial invoices, 6-month rolling final invoices, and expiring accounts on their Financials dashboards

GREATER ACCOUNT CONGRUENCY

- Business Office can easily re-allocate charges across accounts prior to period close
