

Engineering Forum 2018 – Proposed agenda

*Timings subject to change.

09:00 – Arrive and registration

09:30 – Welcome and Introductions

09:40 – What’s New in Autodesk Inventor 2019

Significant improvements are made with each major and point release and the 2019 version will be no exception. We’ll give you a guided tour of all the latest features that will enhance your design productivity as well as introducing you to CADIT for Inventor, a ‘must-have’ for anyone involved in metal fabrication design.

10:40 – Break

11:00 – Work smarter by unlocking your Engineering data

Streamline your data sharing processes using Autodesk Vault with Naviate and Sovelia Engineering. See what’s new in Autodesk Vault 2019 and learn how Naviate and Sovelia Engineering can extend the value of design data to other parts of your business.

12:15 – Lunch

13:15 – Design better products and reduce your business risk

Simulation early in the design process can reduce the risk of product failure, improve product performance and reduce material costs. With the inclusion of Autodesk Nastran In-Cad with the Product Design Collection, now is an ideal time for your whole team to integrate validation into your design processes.

13:45 – How Cloud computing is changing the game for product designers

Autodesk Fusion 360 is enabling companies to be more flexible in their design approach by providing a comprehensive toolset that can be accessed anytime and anywhere. See how this could complement or revolutionise your current design activities.

14:15 – Autodesk Inventor Tips and Tricks

If you’ve ever thought “There must be an easier way of doing this” then this session is definitely for you. See practical examples of how these little know features and shortcuts can you save you hours, days or even weeks.

14:25 – Break

14:35 – Industry focussed session

In this session we will present topics that are relevant to key industries.

15:10 – Close
