High quality, non-laminated printing process with an available varnish add-on for additional color enhancement

RIC

High Density Polyethylene #2

▲ BAG DETAILS

The #2 HD Stand-Up™ bag is constructed of high-density polyethylene, offering a more stiff and robust packaging for fresh produce to stand upright on the shelf.

This light-weight packaging is comparable to polypropylene in stiffness, offering the same rigid feel, while significantly reducing waste, energy use, and global warming potential than alternatives.

 **MADE IN AMERICA** RECYCLABLE. REUSABLE. RIGHT NOW.
