Maximize Exam Security Using Remote Proctoring Without WiFi

ExamSoft

ExamMonitor — Virtual Test Proctor

Regardless of the setting, exam security can be a challenge. ExamMonitor provides technology-enabled remote proctoring to help institutions ensure exam integrity and deter academic dishonesty. ExamMonitor allows educators to deliver assessments, with the assurance that strong security features will flag any behavioral anomalies during the exam.

Administer next-level exam proctoring and security for both large-scale, in-person classes or online courses.

Detect abnormal exam-taker activity that could potentially indicate academic dishonesty.

Provide comprehensive evidence of exam-taker behavior for administrative or legal review as part of disciplinary action.
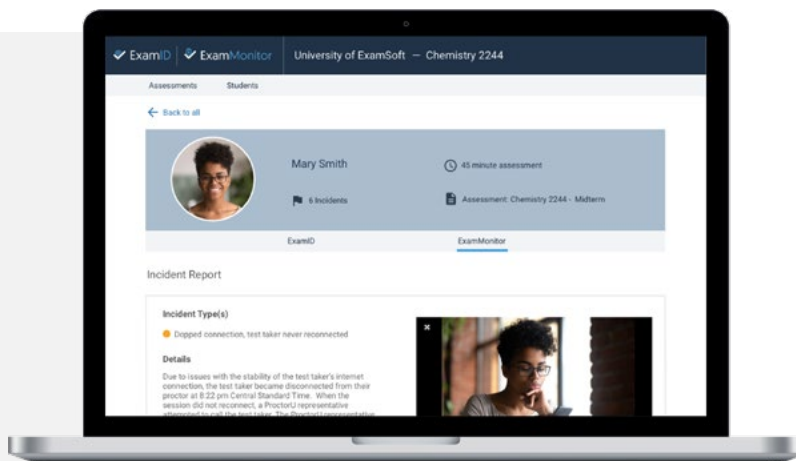

The Process

Students begin by logging in to ExamID and taking and approving a photo of themselves. Once the exam has begun, ExamMonitor records continuous audio and video using both webcams and screen capture functions. No WiFi connection is required during the exam. Once the exam is completed, exam-takers reconnect to the internet, allowing the software to begin automatically uploading answer files and monitoring recordings to the ExamSoft platform for review.

How It Works

1. Exam-takers verify their identity through ExamID at login, before beginning their assessments.

2. ExamMonitor captures audio and video recording of the exam-taker as they navigate through the assessment — even with WiFi disabled.

3. Technology-enabled proctoring flags any unusual behavior during the assessment. Potential incidents do not stop the exam.

4. Once the exam is complete, the proctoring files are uploaded with the exam answer files and securely stored with ExamSoft.

5. Exam administrators receive a time-stamped proctoring report for all flagged incidents so they can review and make final determinations around potential integrity violations.

Note: You must have ExamID to use ExamMonitor.

24/7 proctoring support

_____

Tracking of both desktop and webcam activity

_____

Proctoring reports available within ExamSoft portal

_____

Potential anomalies automatically flagged for review

_____

End-to-end audio and video playback for faculty

✔ ExamSoft

ExamSoft is the digital assessment platform that helps institutions achieve higher levels of course, program, and student success. With an intuitive testing application, ExamSoft makes it simple to create, administer, and grade exams, and generate detailed performance reports from the results — all to provide educators with a complete and accurate view of student learning.
