World Penetration of Communications Protocols 2018

Key Findings

BACnet is currently the leading protocol with a high market share globally with demand for this protocol growing in every country worldwide. Other growing protocols are KNX and wireless protocols with LonWorks and proprietary protocols on the decline as open protocols are in greater demand in the market. Manufacturer-independent, open protocols with certification schemes and interoperability with wirelessly connected devices will survive.

Product Segmentation:

- BACnet
- KNX
- Modbus
- LONWorks
- Proprietary
- Other Protocols (includes wireless)
