Would Your Business Benefit from Business Process Automation?

Answer the following questions:

Do you use paper-based processes that move from one person to another?

Do you receive many documents and need a way to process and store them?

Do you find yourself waiting a long time to get approvals and record actions?

Is it difficult to develop reports?

Do you use multiple systems to access data?

Does your data live in local servers?

Is it hard to build these systems?

Are you interested in cloud systems like SharePoint online to better manage collaboration?

Is it difficult to keep up with compliance and record keeping?

If you answered **yes** to any of these questions, your business would likely benefit from Business Process Automation.

iV4's team of automation experts hold decades of experience developing and implementing automated processes that cut costs, motivate employees, and facilitate growth.
