

NEW FEATURE: VEHICLE PICK-UP SCHEDULER

ALLOWS CUSTOMERS TO SCHEDULE PICK-UP AFTER SERVICE

TEXT2DRIVE™ has given your customers a way to schedule a pick-up time for their vehicle following their service appointment and after they pay their bill online. The new pick-up scheduler feature is now part of Speed CheckOut™, further increasing the appeal and convenience of online bill pay.

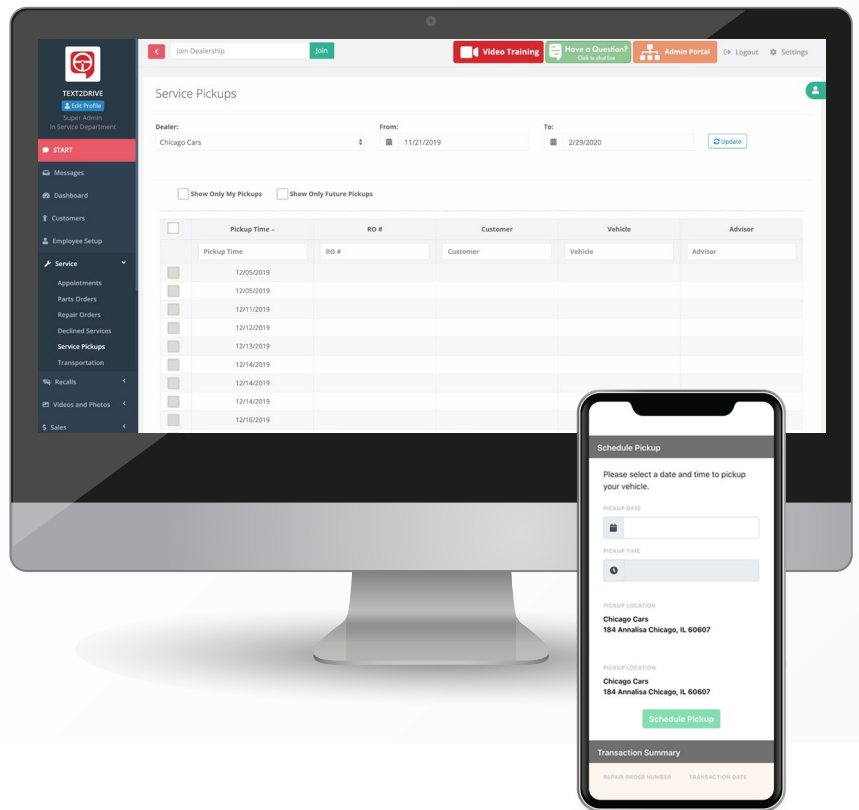

Once the customer pays their bill via Speed Checkout, they are presented with a simple date and time dropdown that allows them to choose a day and time in the next 24 hours. Upon scheduling the vehicle pick-up, TEXT2DRIVE notifies the service advisor assigned to that repair order (RO) of the pick-up appointment.

TEXT2DRIVE provides an informative interface, similar to an RO interface, to ensure your service staff can accurately keep track of all pick-up appointments and get the vehicle ready. The interface will automatically display the following sortable fields:

- Pickup Time
- RO Number
- Customer
- Vehicle
- Service Advisor

Each entry is arranged by the scheduled pick-up date, making it fast and easy for your staff to access them.

There is no additional charge for the brand new pick-up scheduler feature.
