Open APIs in EU banks - how to comply with EU PSD2 regulation.

Steve Melan

Steve is a highly regarded speaker within the IT and financial sectors. He works as a senior IT architect for the State's and Saving's Bank of Luxembourg (former BCEE), and he is recognised as a "Microsoft Most Valuable Professional (MVP)". His expertise and interest within IBM technologies and the Microsoft IT environment makes him a sought-after consultant and speaker.

Ole Kjeldsen

Ole is the National Technology Officer of Microsoft Denmark. Ole possesses extensive knowledge of cloud computing and IT technology combined with a strong business understanding. His know-how and communication skills make Ole a popular speaker, and he has a history of delivering interesting and informative talks.

Martin Michael Frederiksen

Martin is a digital expert and strategic consultant for senior executives within the retail and financial industry. With a history as a CTO, entrepreneur, writer and strategic advisor, Martin is well known for delivering both interesting and engaging talks that captivate the audience.

Agenda

9.00 - 9.30	Registration and breakfast
9.30 - 9.50	Welcome and introduction
9.50 - 10.30	Overview of PSD2 and its consequences for financial institutions <i>by Steve Melan, Senior IT Architect at the State's and Saving's Bank of Luxembourg (former BCEE)</i> The revised Payment Services Directive (PSD2) will have a strong impact on both the IT environment and business strategy for banks across the EU when implemented in 2018. Hear what the consequences of PSD2 regulation will be for the IT environment in your bank.
10.30 - 11.00	Existing solutions and the PSD2 regulation <i>by Steve Melan, Senior IT Architect at the State's and Saving's Bank of Luxembourg (former BCEE)</i> How do existing IT solutions for banks, including solutions from IBM, Microsoft and other major players, comply with the PSD2 Directive?
11.15 - 12.00	Solutions and scenarios for open APIs. <i>by Steve Melan, Senior IT Architect at the State's and Saving's Bank of Luxembourg (former BCEE)</i> Strategies and solutions - how to make your IT environment comply with the PSD2 Directive, and how to create a framework with open APIs across platforms.
12.00 - 13.00	Lunch buffet
13.00 - 13.45	Cloud computing in highly regulated industries Perspectives on GDPR and the cloud as an enabler of business development <i>by Ole Kjeldsen, National Technology Officer, Microsoft Denmark</i> "EU and FSI authorities are introducing new and in many ways stricter regulations, which are often seen as obstacles to business development. However, it is possible not only to use compliance as a positive competitive edge, but it may also be seen as a much needed prerequisite for maintaining and building customer trust in increasingly digitised services. The compliance task at hand, however, can be staggering, and the use of select cloud computing platforms just might be part of the solution!"
14.00 - 14.45	How to be a winner among banks, now - and in the future <i>by Martin Michael Frederiksen</i> The PSD2 Directive is not only an IT challenge, but also a strategic and operational threat to several banks. The consumer trend is shifting towards banking as a service, which poses major challenges to traditional banks if not addressed. Get insights into how your bank could turn these challenges into a competitive advantage in this lively and highly engaging talk from a master in strategic and digital thinking.
14.45 - 15.30	Open discussion Our panel of experts answers questions and engages in dialogue about IT challenges within the financial sector.

Time: Thursday 16 November 2017, 9.00 - 15.30

Place: Microsoft Denmark, Kanalvej 7, 2800 Kongens Lyngby, Denmark

Limited number of places. Register today.

Insights and practical guidance on implementing the EU's PSD2 Directive.

About Bizbrains

This event is hosted by Bizbrains and Microsoft. Bizbrains delivers integrations, Biztalk and Azure API management.

About PSD2

On 13 January 2018, the Payment Services Directive 2 (PSD2) will enter into European Union law. With PSD2, bank customers will be able to grant a third party (TPP) access to make payments or retrieve information through open APIs in any bank, in just the same way that customers do with online apps. The directive will affect banking institutions of all sizes.

Conference

This conference will provide you with information about the IT challenges the industry faces – and the tools and solutions you need to overcome them.

Find information about the conference and register online.
