

Schlage Automated Deadbolts

SCHL-BE468-CAM-XXX

The Schlage automated deadbolt provides increased home security and convenience. It was designed and manufactured by Schlage, an industry leader and one of the first companies to offer locks for integration in home automation solutions.

- Add increased home security and convenience
- Personalized entry codes
- Email/text alerts upon entry
- Offered in deadbolt configuration, with satin nickel or aged bronze finishes

The Schlage deadbolt stores up to 30 personalized access codes. Each family member can have their own unique code. By associating email or text alerts with these codes, you can keep track of who is home. Imagine the effortless comfort of receiving a notice when the kids arrive safely home from school. You may also assign contingency codes, so a neighbor could gain access in case of emergency. Special one-time access codes may be provided to workers or delivery personnel.

The Schlage automated deadbolt can also be incorporated in multifunctional Scenes. A goodnight command, for instance, could arm the security system, turn off the lights and lock the doors (or just confirm that they are already locked).

Technical Specifications
