Last modified: 08/26/20

Preface

For information on Z-Wave and ClareHome, see <u>Installing Z-Wave with</u> <u>ClareHome Tech Bulletin (DOC ID 1162)</u>.

Notes

- When installing Z-Wave devices, ensure that there is nothing inhibiting their signal. Z-Wave relies on radio signals. Metal or thick walls may limit their signal strength.
- We recommend having 2 or more repeating Z-Wave devices that support beaming.

Introduction

Note: Kwikset 916 Z-Wave door lock may lose app synchronization and reflect the wrong door status. Manually locking/unlocking the door corrects the status in the ClareHome app.

By integrating the Kwikset into the ClareHome control system, your customers can control the door lock from their Android or iOS devices.

When installing the door lock into your ClareHome project, no extra connection is necessary. Install the door lock according to the Kwikset documentation, and then connect it to the home Z-Wave network.

Installing the Kwikset door lock

Only qualified installation technicians should install Kwikset door locks. Follow the installation instructions that came with your equipment. We recommend that you pair the lock with the ClareHome Z-Wave controller before installing it in the door.

Notes

- You must be within 6 feet of the controller for the lock to pair.
- The door lock is configurable using the ClareHome app and FusionPro.

Pairing and removing the Kwikset with ClareHome

Pair the door lock using the ClareHome app.

To pair the door lock using ClareHome:

1. Tap the ClareHome app's **Devices** page.

2. Tap + Add Device.

3. Tap Add Devices.

4. Select the device category, Access.

2:26		
<	Add a Device	
Access		>
🕁 Cameras		>
L Climate		>

5. Select the device type, **Z-Wave Device - Access**.

6. Read through the displayed information, and then tap Add Z-Wave Device.

7. Read the Z-Wave information, and then tap **Start Discovery Mode**.

8. When prompted, use the manufacturer's instructions to pair the device.

Figure 1: Back view of the Kwikset Z-Wave button with the battery cover removed.

(1) The Z-Wave button.

The LEDs next to the Z-Wave button will turn yellow and red, and then the programming LED flashes green indicating that the device has entered pairing mode. When the door lock is successfully paired, there will be a loud beep. It can take up to a minute for the device to pair.

9. Once paired in, the Edit Device page displays.

Customize the device name and location as desired, tapping **Save** when done.

Note: For scenes, notifications, schedules, and automations configuration, see <u>*ClareHome App Guide*</u> (DOC ID 1750)</u>.

To remove the door lock using ClareHome:

1. Tap the ClareHome app's **Devices** page.

2. Tap Access.

>		

3. Tap the 3 dots next to the door lock, and then tap **Remove**.

4. Read through the displayed information, and then tap **Start Removal Mode**.

5. Use the manufacturer's instructions for door lock removal.

Note: Press and hold the same button used in pairing the device to remove the device.

Pairing and removing the Kwikset in FusionPro

Pair the door lock to the project.

To add the door lock in FusionPro:

1. Click **Accounts** in the side menu.
