FAQs

Q - What doorbell chimes work with the Clare Video Doorbell?

A - The doorbell works with most standard mechanical and digital doorbell chimes, plus no-chime installations.

Q - What are the wiring and voltage requirements?

A - The doorbell works with 12-24 VAC transformers and your existing doorbell wiring.

Q - What types of Wi-Fi networks work with the Clare Video Doorbell?

A - The doorbell works with 2.4 and 5 GHz Wi-Fi networks. You'll want to make sure you have enough signal at your front door. -60dBm or greater signal is required.

Q - Do I have to pay for recorded video storage?

A - Absolutely not! The Clare Video Doorbell includes up to 30 days of free recorded footage. You can expand the storage by using larger capacity micro SD cards.

Q - How do I know if someone is at my front door?

A - If someone rings the doorbell, you can answer by accepting the video call. If motion is detected by the doorbell, a notification will be sent to your phone for immediate review.

Q - How do I setup advanced features and learn more about the video doorbell?

A - To learn more, watch video tutorials, and access technical documentation, visit: www.clarecontrols.com/video-doorbell-v3.

Using the Clare Video Doorbell

Wouldn't it be nice to know if your package was delivered? How about being able to see and communicate with family and visitors at your front door?

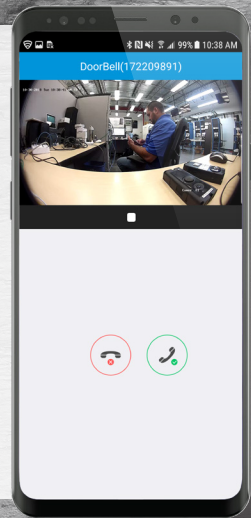

Notifications

The Clare Video Doorbell makes it seem like you are home, even when you're away! Notifications can alert you when something is happening – like a delivery was made, or pesky critters are on the property.

Answering A Call From A Visitor

- 1 Guest rings doorbell
- 2 Notification is sent to your mobile device
- 3 Swipe the notification
- 4 Answer the video call to see and communicate with guests

Viewing Recorded Footage

- Tap the Playback button to review any recorded footage
- View a calendar to see which days have recorded content
- Expand the amount of storage with larger micro SD cards
