

KORE

9" x 9" Hit & Miss Ventilator - Data Sheet

Key Features & Benefits

- Easy to install and maintain
- Allows for manual adjustment of airflow
- Integral flyscreen to reduce light, draughts and insects
- Slim, low-profile design to minimise appearance
- Meets all current Building Regulations, including Part F - Ventilation (2009) and requirements for all Better Energy Homes Schemes

Applications

KORE's 9" x 9" Hit & Miss Ventilator is designed to provide room background ventilation. Required airflow can be manually adjusted from the vent cover. **This vent is not designed or suitable for combustion appliances.**

Technical Details

Free Area: 13,000mm²

Size: 241mm x 241mm (9" x 9")

Colors: White

Material: High Impact Polystyrene

Installation Guidelines

KORE 9" x 9" Hit & Miss Ventilators are easily installed to provide background ventilation in rooms where required:

- With a hole drilled in wall to appropriate size, detach the flyscreen from the front cover of vent
- Fasten the flyscreen over the opening
- Ensure the front cover is aligned with the flyscreen and simply snap into place
