FOREST2MARKET DATA CONTRIBUTOR PROGRAM

OVERVIEW

The Forest2Market® Online Stumpage Database contains transaction level details from over \$3.0 billion of tract-by-tract timber sales dating back to 2000. Data contributors include timber buyers and sellers. Product price and volume, logging condition, and tree size (avg. DBH) are reported for each sale. Submitted sales must pass a 15-point fitness check and deemed by experienced foresters to be complete and accurate to qualify.

Forest2Market's online stumpage database is the most complete and accurate timber pricing service in the southern United States.
