

UltraHP[®]

HIGH PROFILE RIDGE CAP SHINGLES

Preformed, precut cap shingles protect and beautify. No cutting or folding.

UltraHP®
HIGH PROFILE
RIDGE CAP SHINGLES

When you've just built a roof with IKO premium shingles, there's only one way you can top its long-lasting good looks – with IKO UltraHP® or impact resistant¹ IKO UltraHP®IR High Profile Ridge Cap Shingles!

These, specially constructed ridge cap shingles are designed to provide a high-quality alternative to using cut-up shingles to protect this important area.

The "HP" stands for "High Profile," which means that they're also designed to enhance the architectural shake-like appearance and dimensional profile of our premium architectural fiberglass shingles.

Beautiful protection against the elements – and easy to install, too!

- ✓ Dramatic high-profile design adds dimension, depth and texture.
- ✓ Enhance your home's aesthetic appeal by accentuating the roofline and rakes.
- ✓ Multi-layer construction for durability and superior tear strength values.
- ✓ Extra performance of polymer modified asphalt coating.
- ✓ Preformed rolled design features a curved edge and has an 8-1/4" exposure – no need to cut or fold on the roof.
- ✓ With an 8-1/4" exposure you get almost 30% more coverage than with a traditional ridge cap shingle. Fewer pieces to install can save time and labor.
- ✓ Because there are fewer pieces to install than with traditional hip and ridge products, there's less labor involved.

Roof-Line

How much do you need?

- ✓ An average 2500 sq. ft. home requires approximately 70 linear feet of IKO **UltraHP®** or impact resistant¹ IKO **UltraHP®IR** High Profile Ridge Cap Shingles. To determine how much you need, measure the roof's ridges, hips and dormers. If you wish to add along rake, please include measurement in calculation.
- ✓ Each box covers approx. 20 linear feet.
- ✓ For 100 linear feet of coverage, approx. 5 boxes will be required.
- ✓ Available in 10" width.

Rakes

Take quality to another dimension on your next roofing project!

¹IKO UltraHP®IR hip and ridge shingles have a Class 4 impact resistance rating tested against UL 2218, which IKO is pleased to present for the sole purpose of enabling homeowners using these shingles in conjunction with Class 4 impact resistance rated shingles to obtain a discount on their home insurance premiums, if available in their area. This rating is not to be construed as any type of express or implied warranty or guarantee of the impact performance of this shingle by the manufacturer, supplier or installer.

Note: Ultra HP/ Ultra HP IR is 10" wide. When used in conjunction with ridge vent, a vent width of 9" or less is required. Please note either Ultra HP or Ultra HP IR can be used with IKO laminate shingles. However, Only Ultra HP IR should be used in conjunction with impact resistant shingles.
