WHO WE ARE

100% Smarter Than Wood™

TimberTech® decking has the look and feel of traditional wood, with the added strength, durability and sustainability of a composite material.

We Know Durable Decks

TimberTech capped composite decking is tough enough to resist mold, mildew, stains and scratches. We back that strength with our 30-year limited fade and stain warranty on Legacy, Tropical, and Terrain™ Collections, as well as our 30-year limited warranty that covers material defects resulting in splinters and damage from termites or rot on all TimberTech decking. That's how we fulfill our mission of building America's most enduring, durable and enjoyable outdoor living spaces. We are also proud of our continued conservation and sustainability efforts. TimberTech decking is made from up to 73% recycled materials, saving tens of thousands of trees each year. TimberTech is part of AZEK® Building Products, the industry-leader in performance building materials.

Made in the USA

 **TimberTech**
by AZEK Building Products

#1 in Premium Decking

Engineering beautiful, high-performance, low-maintenance outdoor building materials is at the core of what we do at AZEK® Building Products. When investing in your outdoor space, it's important to select materials that suit your lifestyle. Maintenance, care and upkeep can greatly impact the cost of your deck over time. You'll find, wood just can't compete.

Benefits of Capped Wood Composite: TimberTech®

Made from up to 73% recycled materials, including a composite of plastic and wood fibers, TimberTech is the sustainable choice and eliminates annual sealing and staining for protection. Plus, TimberTech's protected wood composite is coated on all four sides, providing long-lasting durability. It is also resistant to mold, mildew and moisture damage.

Benefits of Capped Polymer: AZEK®

With an enhanced real-wood look and strength backed by Alloy Armour Technology™, AZEK's capped polymer decking is best in quality and designed to endure. With AZEK, you'll get award-winning, sophisticated color palettes, matched with industry-leading warranties and a product that won't splinter, rot, crack or warp.

Disadvantages of Wood

Wood options can vary, but all have characteristics that should be considered before making the investment. Pressure treated lumber, like pine, can fade quickly and requires frequent sanding and staining. While it appears to be more affordable upfront, it can actually exceed the cost of a composite deck over time. The price for Redwood and Cedar is growing as environmental conditions, like forest fires, contribute to declining supply. Exotic and tropical woods, like Ipe, contribute to deforestation and are not sustainable.

* Cost of ownership is an estimate based on the average deck size of 320 sq. ft. and includes all materials and labor for annual cleaning/staining and pressure washing.

Backyard Trendsetters

From color mixing to dining outdoors and dynamic curved designs, TimberTech® is as versatile as it is beautiful. Get inspired by these on-trend decking ideas.

1 Legacy Collection: Tigerwood, Pecan & Mocha

1. Mix & Match Make your project pop by selecting multiple deck colors and blending them throughout your space. TimberTech's Legacy Collection is crafted with variegated tones to reflect the look of real wood. **2. Waterfront Oasis** Keep your deck looking as beautiful as your view. Oceanside or lakefront, ensure your investment is resistant to moisture damage, mold and mildew. **3. Curve Appeal** Accentuate the features of your fountain, pool or natural landscaping with rounded edges and fluid lines. The flexibility offered by state-of-the-art TimberTech materials makes curved decks an easy look to achieve. **4. Elegant Eats** Luxury outdoor kitchens deserve premium flooring. Be worry free as you feast al fresco, TimberTech Decking is easy to clean and resists stains from spills. **5. Pool Deck** Swim and sun in style. TimberTech's innovative composite decking won't splinter, crack or warp. Your feet will thank you.

TRENDS

Colors That Tell A Story

Personalize your TimberTech® deck with these diverse palettes and on-trend color schemes.

Deck shown in Tigerwood, Pecan, and Mocha with Impression Rail™ in Bronze

Legacy

Harmony without predictability. These pairings feature contrasting color streaks that vary from board to board to emphasize the natural characteristics of real wood.

Top to Bottom: Mocha, Ashwood, Pecan

Tropical

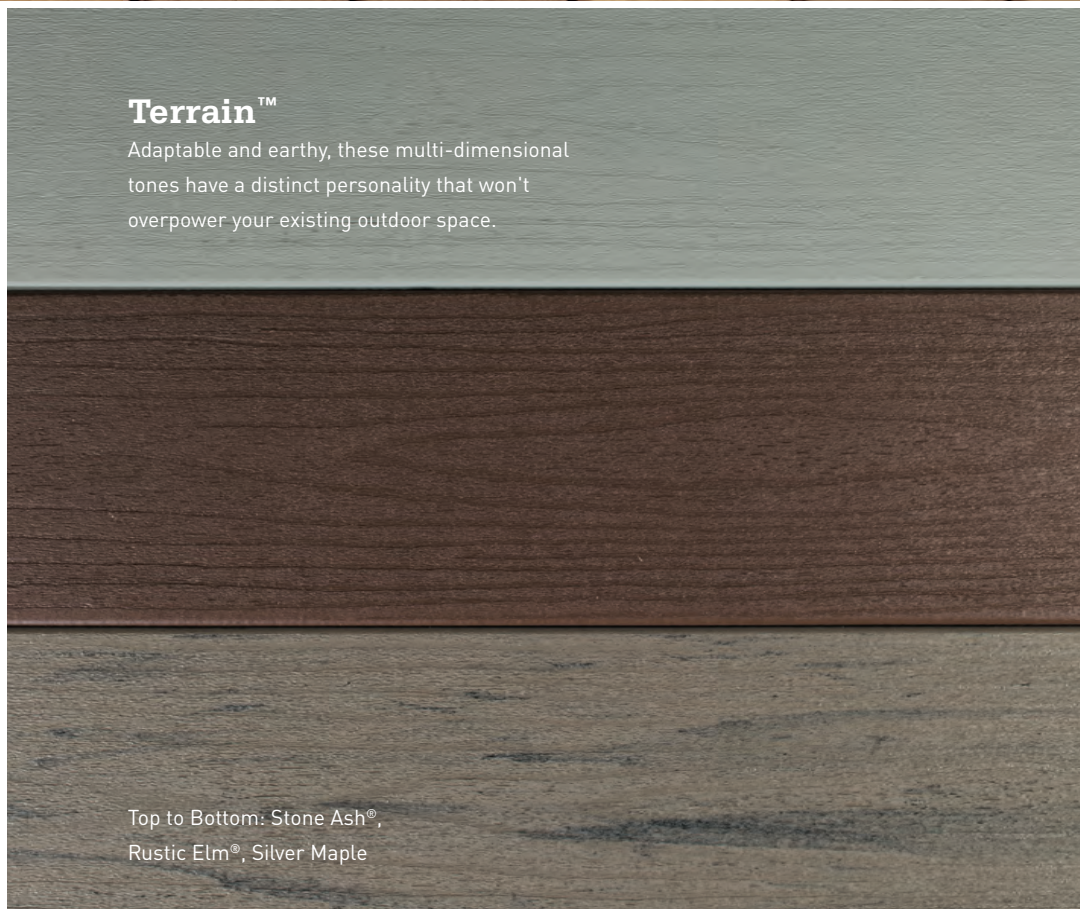

A vacation haven in your own backyard. These robust, sun-soaked hues emulate exotic woods with dramatic highlights.

Top to Bottom: Antigua Gold®, Caribbean Redwood®, Antique Palm®

Terrain™

Adaptable and earthy, these multi-dimensional tones have a distinct personality that won't overpower your existing outdoor space.

Top to Bottom: Stone Ash®,
Rustic Elm®, Silver Maple

Decking

A high-angle photograph of a curved wooden deck overlooking a swimming pool. A young child in a blue shirt and dark shorts is standing on the deck, holding a large, light blue inflatable shark. The pool is in the foreground, with its curved edge visible. The background shows a lush green hillside with some houses and trees under bright sunlight.

We give our decks the chops they need to battle almost anything Mother Nature—or your family—throws their way. But we don't sacrifice beauty for backbone. So kick off your shoes, light up the grill, and enjoy your deck.

Wood Composites and Capped Wood Composites

Legacy Collection | Tropical Collection | Terrain™ Collection | ReliaBoard® | TwinFinish® | DockSider™

Depending on environmental conditions, TimberTech® Deck colors may appear to change over time as part of the natural weathering process consistent with the warranty guarantees where applicable. All TimberTech Deck products will experience weathering.

Deck shown in Tigerwood with RadianceRail®

Let's Get Decked Out

Craft a deck as beautiful and lasting as the memories you'll create on it.

Board-To-Board Color Variations

At TimberTech® we go to extensive lengths to make our products reflect all of the beauty and nuance of nature. Some of our collections include solid colors while others bear subtle to more pronounced highlights to closely resemble the characteristics of real wood. This intended effect is known as color variegation. To achieve this, we use various pigments and stains to replicate the features found in traditional lumber. Some of our collections also have cascading colors, which add a gradual, gradient appearance throughout the length of the board. The degrees of cascading and variegation will vary from board-to-board.

Legacy Collection

Designed to reflect the true tones of natural wood, this is our most uniquely variegated line which includes cascading colors. The artisanal, hand-scraped texture has a refined appearance matched with the most advanced design technology available.

Tropical Collection

Bring a beachside paradise to your backyard with unique, sun-soaked tones. These authentic, natural colors are moderately variegated and feature a more pronounced grain texture.

Terrain™ Collection

Classic, earthy and adaptable tones that blend well with a variety of architectural styles and existing home decors. This collection is perfect for those who prefer a more traditional look. With a highly textured grain pattern, these tones have slightly variegated nuances or, in the case of our solid colors, no variegation or markings of different colors.

Please use below key to understand the color styles presented on following pages.

Solid Color
A single color without discrete markings

Variegated Color

TwinFinish[®], DockSider[™], & ReliaBoard[®]

DockSider Decking: Gray

TwinFinish Decking: Gray

TwinFinish Decking: Cedar

DECKING

TwinFinish® & DockSider™

These wood composite collections combine beauty and function. Both available in warm Cedar and crisp Gray, TwinFinish features a VertiGrain slip-resistant surface, while DockSider is robust enough for applications with heavier loads or longer spans like marinas or boardwalks.

Color Choices

ReliaBoard®

Available in traditional Cedar and Gray, the ReliaBoard Collection strikes a balance between traditional aesthetic and affordable value, making a low-maintenance, long-lasting deck accessible on any budget.

Color Choices

TwinFinish®, DockSider™ and ReliaBoard® are covered by TimberTech's 30-Year Limited Warranty but do not include separate fade and stain coverage. TwinFinish, ReliaBoard and DockSider are designed to naturally weather over time and the surface grain pattern will weather to a more consistent color. Most of the weathering process will be complete within the first year of the deck's life.

Railing

After you select your decking, create a finished look you can be proud of by framing your space with beautiful, high performance railing.

Shown: Amazon Mist® Deck with Premier Railing®

Select Your Rail Style

Select the rail style that best complements your home. From the clean lines and striking silhouette of a contemporary profile to an elaborately detailed and robust traditional profile, each of these rail lines makes a statement. Backed with a 25-year limited warranty, all of our railing profiles undergo rigorous testing, ensuring they are as safe as they are stunning.

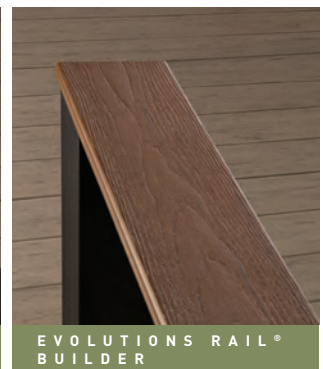

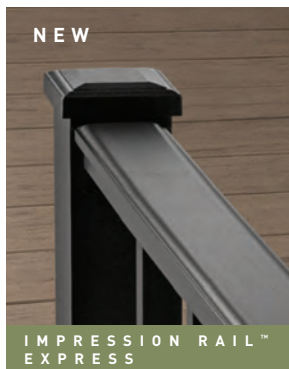

Classic Styles

Although TimberTech® Deck products are cooler to the touch than many other deck board products, all decking products will get hot in the sun. Additionally, the darker the decking color, the hotter it will feel. For hotter climates, consider choosing a lighter color. While the product is designed to resist fading, no material is fade proof when subjected to years of exposure to ultraviolet (UV) rays and the elements.

The product applications depicted in this brochure are for display purposes only and not for the purpose of validating the suitability, warrantability or safety of any particular installation or application of the product.

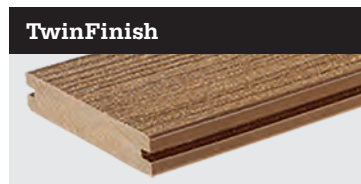

When considering TimberTech Deck in a rooftop application, it is important that the decking is attached to proper framing that is securely attached to the building and it should not be attached to a floating frame or substructure. Always consult the TimberTech installation instructions as well as local building codes to ensure proper installation.

TimberTech products are designed to resist fading. Depending on environmental conditions, colors may change over time, consistent with the warranty guarantees where applicable. For complete warranty information on decking products, visit: [TimberTech.com/warranty-and-care](https://www.timbertech.com/warranty-and-care).
