

ENAVATE ISV SERVICES

THE TOOLS AND EXPERIENCE YOU NEED TO BUILD A BETTER SOLUTION FOR YOUR CUSTOMERS

Independent Software Vendors (ISVs) are facing a transformation. With customers moving to the cloud and to subscription-licensing models, ISVs must embrace digitally enhanced products, services and experiences to meet customers' heightened expectations.

To deliver the best customer experience, ISVs must partner with Microsoft to migrate, build and deploy their solutions on Dynamics 365 and Microsoft Azure. ENAVATE's ISV Services team provides necessary support with full-cycle solution-build services for Microsoft Business Applications, as well as continuous upgrades. We listen, challenge and collaborate, ensuring that together we build a better product your customers will love.

SOLUTION BUILD

At ENAVATE, we bring ISV solutions to life. Our capability allows us to work with companies throughout the product cycle, from project assessment to product release. Or work with us only on phases you need support on. Either way, we have the experience to complete a seamless and inspiring product build.

INTEGRATION SERVICES

ENAVATE focuses exclusively on Microsoft Business Applications; we are experts in third-party software integration, allowing ISVs to grow faster by providing increased value to customers. We help you build and integrate applications using Common Data Service (CDS), PowerApps, Microsoft Graph, Microsoft Flow and Logic Apps.

SOLUTION MAINTENANCE

In today's competitive market, your focus needs to be on winning market share – not on maintaining solutions. ENAVATE's ISV services team can take care of supporting and improving your product, keeping it up to date, providing backward compatibility and setting up reliable release management.

CLIENT IMPLEMENTATIONS

ENAVATE's comprehensive implementation services include maintenance of environments; solutions deployment; and development, quality assurance and delivery of the customizations your customers need. Our vast experience results in a smooth implementation for your clients, so that you can focus on your ISV business.

MICROSOFT ONBOARDING

With strong Microsoft support, we provide ISV customers consulting services to guide you through Microsoft onboarding. We walk you through each step, from obtaining Microsoft support through publishing your solution on AppSource. With our guidance, you can realize the competitive advantage that comes with being a Microsoft partner.

QUALITY ASSURANCE

Whether you're adding features, migrating to a new version or stabilizing your existing ISV solution, ENAVATE can help build a quality assurance process that guarantees that your product exceeds customer expectations. We put your solution through rigorous testing to predict and eliminate defects.

BIG DATA

ISVs must invest in Big Data to make their business applications more competitive. Microsoft Azure for Big Data includes services for Artificial Intelligence, the Internet of Things, Cognitive Services and more to make this a reality. ENAVATE helps ISVs to select and implement the right technologies.

POWER PLATFORM

Microsoft Power Platform empowers users to build the solutions they need quickly and easily. We support user-interface (UI) modeling via PowerApps, analytics setup with PowerBI, workflows with Microsoft Flow, and one-click integrations using CDS.

BUSINESS NEEDS

Exploit benefits of modern technologies	
Increase market presence	
Engage with Microsoft	
Efficient product delivery	
Legacy system maintenance	

BUSINESS OUTCOME

Enhanced user experience
Growth of customer base
Microsoft supports customer's business
